MM of the TelCo 2013-05-29
Topic: IEEE 802.3 SG DMLT, AdHoc Tutorial.

Dear presenters of the Geneva DMLT tutorial,

Today at 17:00 German time we have had a TelCo with the following participants:
- Norm Finn
- Albert Tretter
- Ludwig Winkel.

We discussed my approach to assign all presenters to the agreed topics, see Victoria meeting, or to reduce the amount of presenter with the argument not to lose too much time with switching over to the next presenter. Another option is that just a few will present and the others participate as panelists during the discussion. See the EXCEL sheet attached.

As we did have had a low attendance during today's TelCo, we suggested to ask the complete presenter-group about their opinion and also suggestions until Monday June 3, 8pm PDT. We should come to a decision who will present what next week, so that the presenter will have enough time to prepare the presentation.

Another problem for some that uses MAC was to use Live Meeting. Norm will provide the more common WebEX for the next scheduled meeting June 12. As the AVB Telco will be one hour after this, I am asking you to allow us to start next June 12 meeting one hour earlier at 4pm German time = 7am Pacific time or that AVB starts an hour later or that we start 30 minutes earlier and AVB starts 30 minutes later. Please provide feedback until next Monday.

Mit freundlichen Grüßen
Ludwig Winkel
