## Power for Greater than 10BASE-T1L

Heath Stewart et al

AHEAD OF WHAT'S POSSIBLE™

## 10BASE-T1L Power Considerations

- Powered Ethernet Networks are critical to successful adoption in the marketplace
  - PoE is seeing steadily increasing penetration in the traditional CAT-N Ethernet market
  - Power is an integral feature of past, present and future SPE networks
- Support for a power objective has been expressed in this Study Group
  - https://www.ieee802.org/3/SPEP2P/public/graber\_3SPEP2P\_01a\_06232021.pdf
- Propose the Study Group and Task Force explore power solutions appropriate for given topologies
  - Star Topologies
    - Allow high-reliability point-to-point connections a la PoE
    - Clause 104 has already been defined for 10BASE-T1L
    - Add Type for 100BASE-T1L et al
  - Line Topologies
    - Popular in OT networks and deployments
    - Consider new clause for line power topologies
