Presentations/Discussion.

802.3bz2.5G Impedance Balance Specification – Amrik Bains

- Should the contributions of different components be defined in the spec?
    - No, 802.3bz only defines at certain test points. There is a difference between what the standard defines, and what implementers need to work out.
    - How can component implementers work out what they need? Interesting discussion – but in the tradition of BASE-T, this is beyond scope of 802.3bz.

Other Discussion/Observations:

- 802.3bz Editor made the offer to assist commenters with draft comments to improve proposed text/text location etc.

Meeting closed – 9:30am
