# Maintainers

- <your name here>

# Repository stuff

- [802.3 YANG](#) has the default basic setup, review/change as appropriate.
- Auto DevOps pipeline, enforce coding guidelines, stop bad commits

# Administrivia

- AdHoc process/rules of the road for non-802.3 people.
- Issue review process
- Pull request review process
- Virtual meeting cadence/timeslots

# Models etc

- What's missing from 2025?
  - Published amendments
  - In flight
- YANG Experts review
  - Find volunteers to review current models for good YANG hygiene
