

Meeting summary and path forward

(submitted from the floor)

Glen Kramer

This seems to be common opinion:

- If NG-EPON spec includes MSD-WDM PON, it should ensure the commonality of optical components with NG-PON2

Possible path forward

	10 Gb/s	25 Gb/s (Adv. Modulation)
One wavelength in each direction	Existing 10G-EPON spec	<p>New 25G-EPON MAC/MAC Ctrl</p> <p>New 25G-EPON PHY/optics – probably in O-band.</p>
4 (8) wavelengths in each direction	<p>MAC: existing 10G-EPON spec (+ minor adjustments)</p> <p>PHY: reference NG-PON2 optics spec</p>	<p>MAC: New 25G-EPON MAC/MAC Ctrl (+ minor adjustments)</p> <p>PHY: reference NG-PON2 optics spec</p>

Green – new specification

Yellow – get this (almost) for free
