1. Add to the comments of items 8,9,10,11 in table 33-5: "see figure 33-14"

2. Update figure 33-14 by adding labels for the operating mode regions and show that for Iport<I_{CUT} for t>T_{OVLD} , Vport=Vnominal.
   Attached revised figure 33-14.

3. Add to the title of figure 33-14 the following:
   "Figure 33-14: Port voltage requirements during Normal powering mode, Over Load and short circuit condition as function of Iport current and time duration"
