
802.3bp Baseline Optional Link segment

**Norfolk, Virginia
May 2014**

**Chris DiMinico
MC Communications/Panduit
cdiminico@ieee.org**

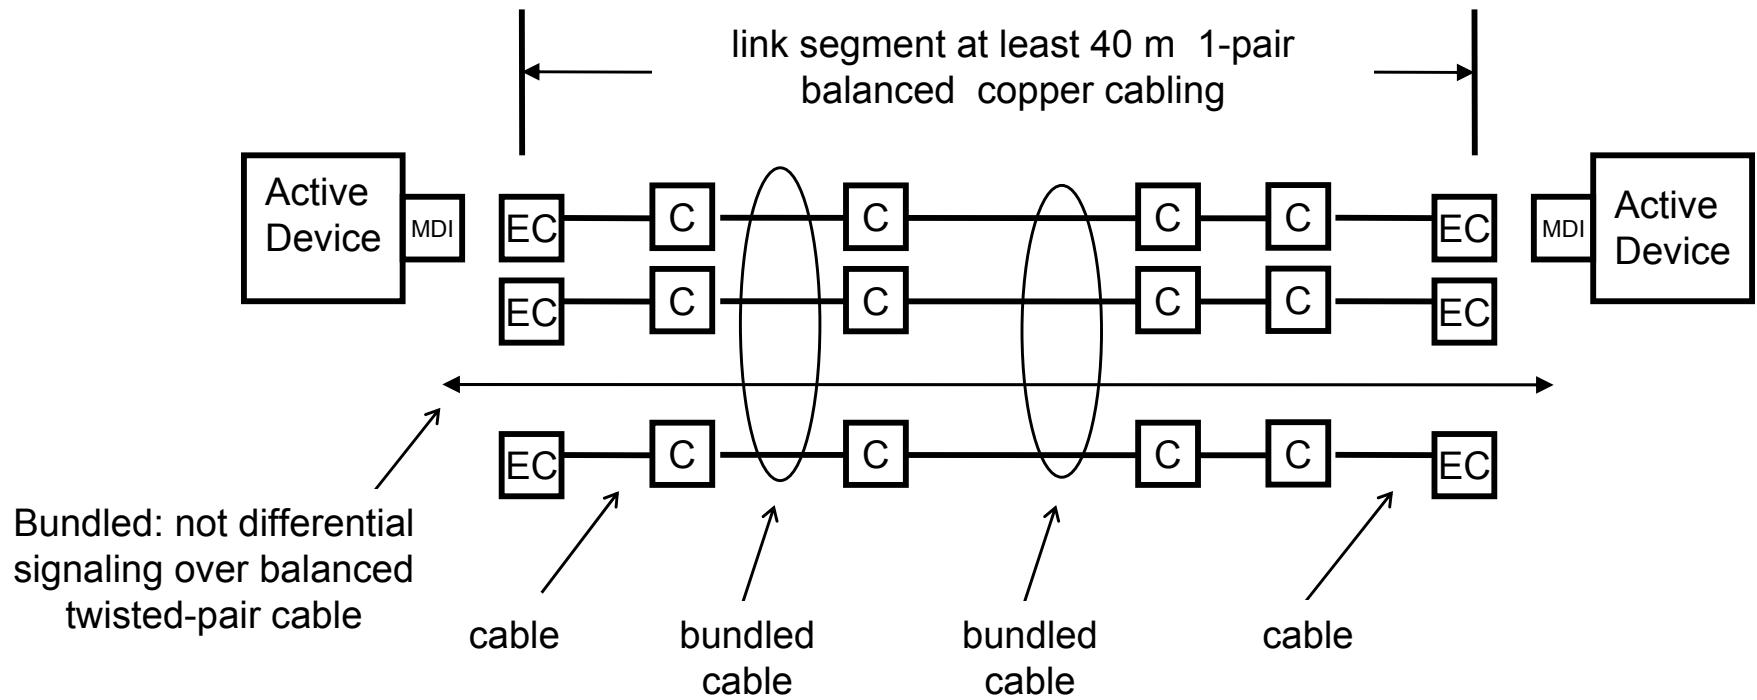

Purpose

- Baseline for the 802.3bp optional Link Segment (ScTP/Shielded)
- Fill-in optional link segment TBD's in 802.3bp D0.30 Clause 98.

Discussion

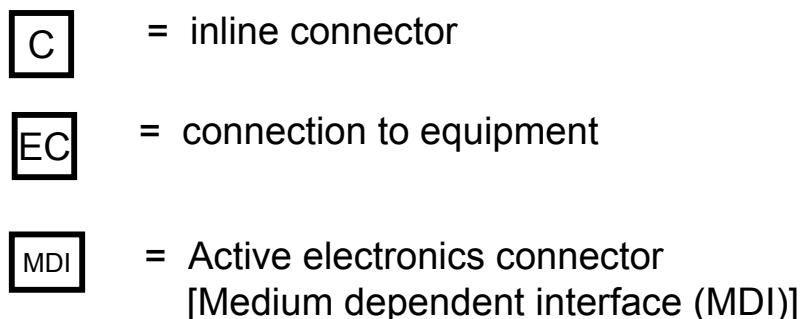

- I've spoken with phy contributors to the 802.3bp phy specifications regarding the optional link specifications; all have indicated that return loss is the key parameter to consider.
- Further agreements on phy characteristics during and immediately following May Interim will enable return loss considerations with more specificity of applicable phy attributes.
- I've decided to hold-off trying to close optional link segment proposal till after May IEEE Interim .
- In the meantime, I'm planning to provide the phy ad hoc with optional link measurements including coupling attenuation characterization.

802.3bp Link Segment (optional)

The IEEE 802.3 nomenclature is bracketed to identify relationship to the IEEE 802.3 definitions.

Length objective [EC] to [EC] at least 40 m
Number of inline connectors [C] = 4

1000BASE-T1 Link Segments IL

98.4.4.2.1 Insertion loss

The insertion loss of each type B link segment shall meet the values determined using Equation (98-4).

$$\text{InsertionLoss}(f) \leq \text{TBD} \text{ dB} \quad (98-4)$$

where

f is the frequency in MHz; $1 \leq f \leq 600$

This function `InsertionLoss(f)` accounts for the insertion loss of the balanced cabling pair and four inline connectors within each link segment.

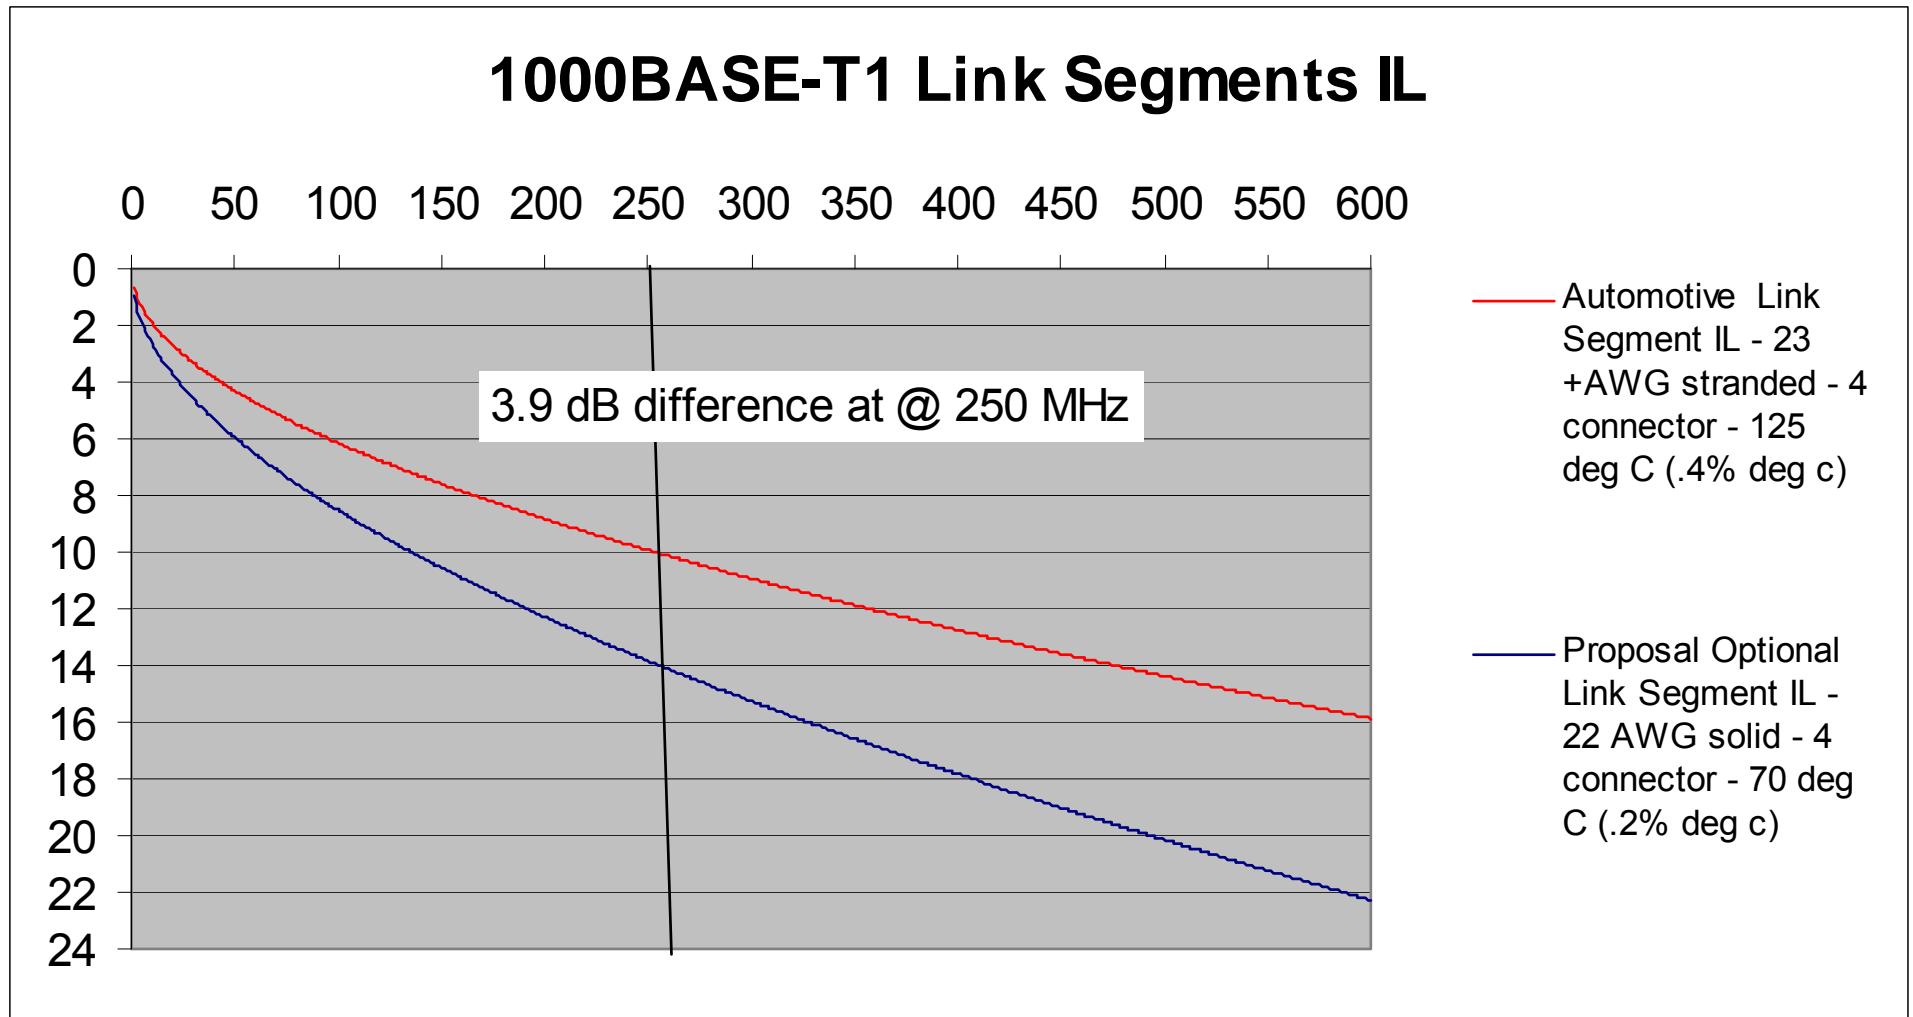

Link segment transmission parameters (ScTP/Shielded)

Link segment transmission and coupling parameters (ScTP/Shielded)

- Insertion loss - 22 AWG solid copper at 70 degrees C (0.2% deg C)
- Return loss (UTP proposal)
- Coupling attenuation - ANSI/TIA-1005-A-2012 Telecommunications Infrastructure Standard for Industrial Premises. Electromagnetic environmental classifications specified in ANSI/TIA-568-C.0.
 - Automotive electromagnetic environmental classification added.
- Insertion loss

$20.14 \text{ dB } @500 \text{ MHz}$	40 meters cable	$\frac{\text{four}}{\text{connectors}}$	ILD
$InsertLoss(f) \leq 0.7131\sqrt{f} + 0.0048 \cdot f + \frac{0.1320}{\sqrt{f}} + 0.08\sqrt{f} + 0.018\sqrt{f}$			
802.3bp (RTPGE)			

1000BASE-T1 Link Segments IL

1000BASE-T1 Link Segment RL

98.4.4.2.3 Return loss

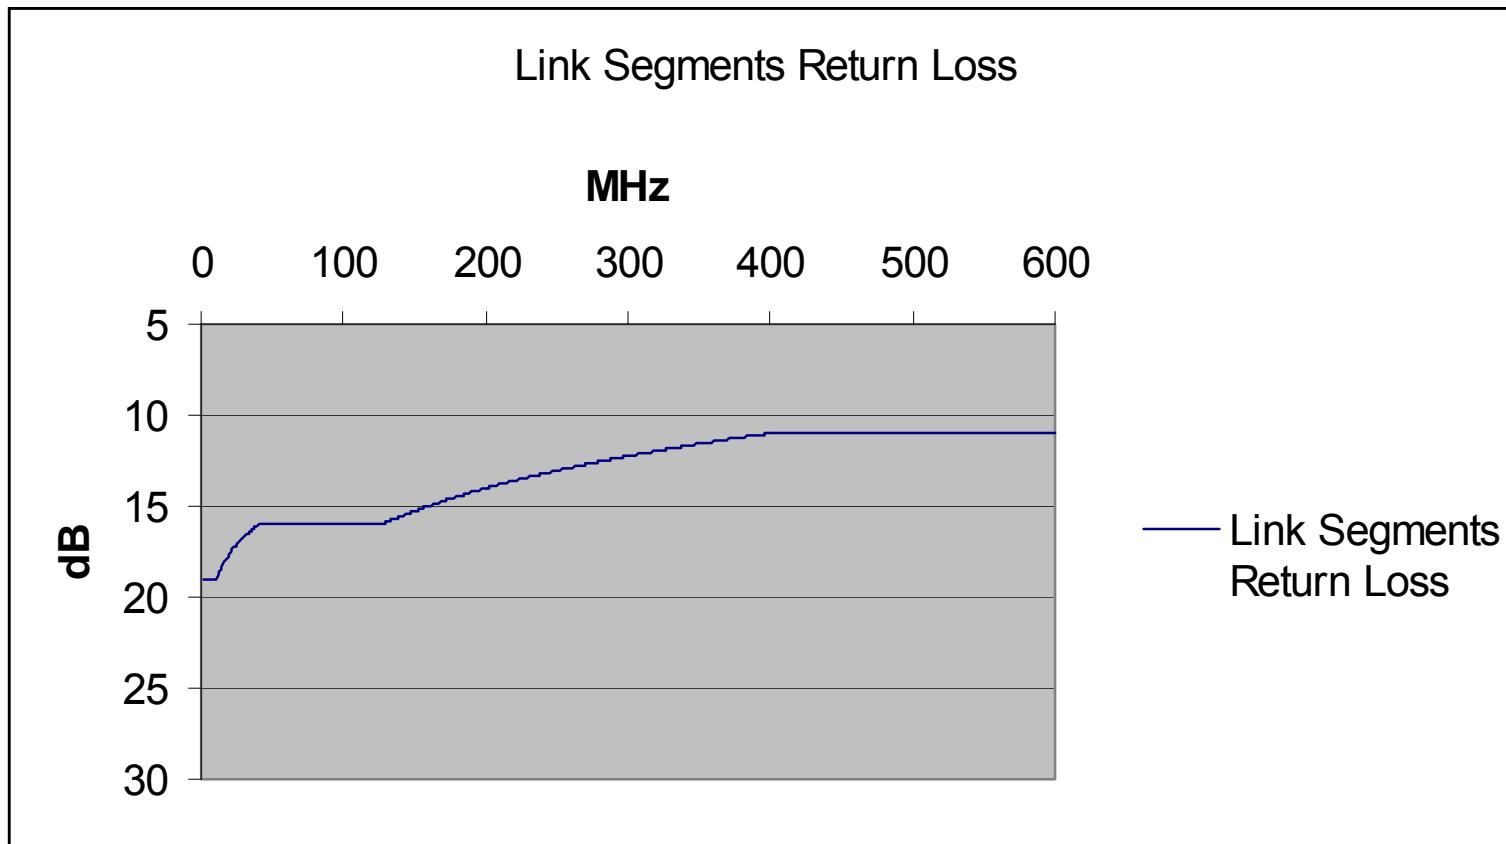

In order to limit the noise at the receiver due to impedance mismatches each type B link segment shall meet the values determined using Equation (98-5) at all frequencies from 1 MHz to 600 MHz. The reference impedance for the return loss specification is 100 Ω .

$$\text{ReturnLoss}(f) \leq \text{TBD} \text{ dB} \quad (98-5)$$

where

f is the frequency in MHz.

Automotive and Optional Link Segment Return Loss

Frequency range	Requirement
1-10 MHz	19 dB
10-40 MHz	$24 - 5\log(f)$ dB
40-130 MHz	16 dB
130-400 MHz	$37 - 10\log(f)$ dB
400-600 MHz	11 dB

802.3bp (RTPGE)

Link segment transmission parameters (ScTP/Shielded)

- Coupling attenuation - Consistent with Category 6A specified in ANSI/TIA-1005-A-2012 Telecommunications Infrastructure Standard for Industrial Premises. The coupling attenuation requirements (E1, E2, E3) depend on the electromagnetic environmental classifications specified in ANSI/TIA-568-C.0. The coupling attenuation requirements (E4) TDB depend on the electromagnetic environmental specifications for automotive applications.
- Coupling attenuation

Frequency (MHz)	Minimum (dB)			
	E1	E2	E2	E4
30 ≤ f ≤ 600	80-20Log(f) (Max 60 dB)	90-20Log(f) (Max 60 dB)	90-20Log(f) (Max 60 dB)	TBD

- Environmental classification

Electromagnetic	E ₁	E ₂	E ₃	E ₄
Radiated RF - AM	3 V/m at (80 to 1 000 MHz) 3 V/m at (1 400 to 2 000 MHz) 1 V/m at (2 000 to 2 700 MHz)	3 V/m at (80 to 1 000 MHz) 3 V/m at (1 400 to 2 000 MHz) 1 V/m at (2 000 to 2 700 MHz)	10 V/m at (80 to 1 000 MHz) 3 V/m at (1 400 to 2 000 MHz) 1 V/m at (2 000 to 2 700 MHz)	TBD Automotive Applications
Conducted RF	3 V at 150 kHz to 80 MHz	3 V at 150 kHz to 80 MHz	3 V at 150 kHz to 80 MHz	TBD Automotive Applications
