

IEEE802.3bu PoDL Taskforce meeting

May 13, 2014 Norfolk, VA USA

Chairman: Dave Dwelley

Meeting brought into session at 9:00am

Jeff Heath volunteered to be the recording secretary.

Chair displayed the agenda.

A motion was made by David Abramson to approve the agenda and seconded by Jeff Heath
The agenda was approved by voice without objection.

Chair reviewed the patent policy slides 1-4 and made the call for essential patents and there were no responses.

Introductions were made

Xiaofeng Wang presented the Noise Limit Report from 802.3bp

Comments on the Noise Report:

1. There are two noise sources that should be considered, one of the PSE side, and one on the PD.
2. Wide band noise should be considered and specified
3. Common mode noise should be specified.

Jeff Heath presented the Power Ad-hoc Report

Andy Gardner presented the PoDL Decoupling Network Presentation

Comments: Ask the RTPG group if they have considered the insertion and return loss in their drop specification.

A liaison presentation was created for 1000Base-T1 by the task force.

A motion was made to approve the presentation by Fred Schindler and seconded by Lennart Yseboodt

It passed by voice without opposition.

A motion was made by Chad Jones to approve the minutes and seconded by Jeff Heath

It passed by voice without opposition.

A motion was made to adjourn by Jeff Heath and seconded by Phillip Brownlee'

It passed by voice without objection.

The meeting was adjourned at 11:40am
