P802.3cd Task Force organization

- Chair: Mark Nowell, Cisco
- Recording Secretary: Kent Lusted, Intel
- Chief Editor: Matt Brown, APM
- Ad hoc chair: Kent Lusted, Intel

Task Force Decorum

- Press (i.e., anyone reporting publicly on this meeting) are to announce their presence (December 2013 IEEE-SA Standards Board Ops Manual 5.3.3.5)
- Photography or recording by permission only (December 2013 IEEE-SA Standards Board Ops Manual 5.3.3.4)
- Cell phone ringers off
- Wear your badges at all times in meeting areas
 - Help the hotel security staff improve the general security of the meeting rooms
 - **PCs HAVE BEEN STOLEN** at previous meetings
 - **DO NOT** assume that meeting areas are secure
- Please observe proper decorum in meetings

Reflector and Web

- To subscribe to the Task Force's reflector, send an email to:
ListServ@ieee.org
with the following in the body of the message (do not include "<>"):
subscribe stds-802-3-50G <yourfirstname> <yourlastname>
end
- Send Task Force reflector messages to:

Task Force Private Area

- None yet

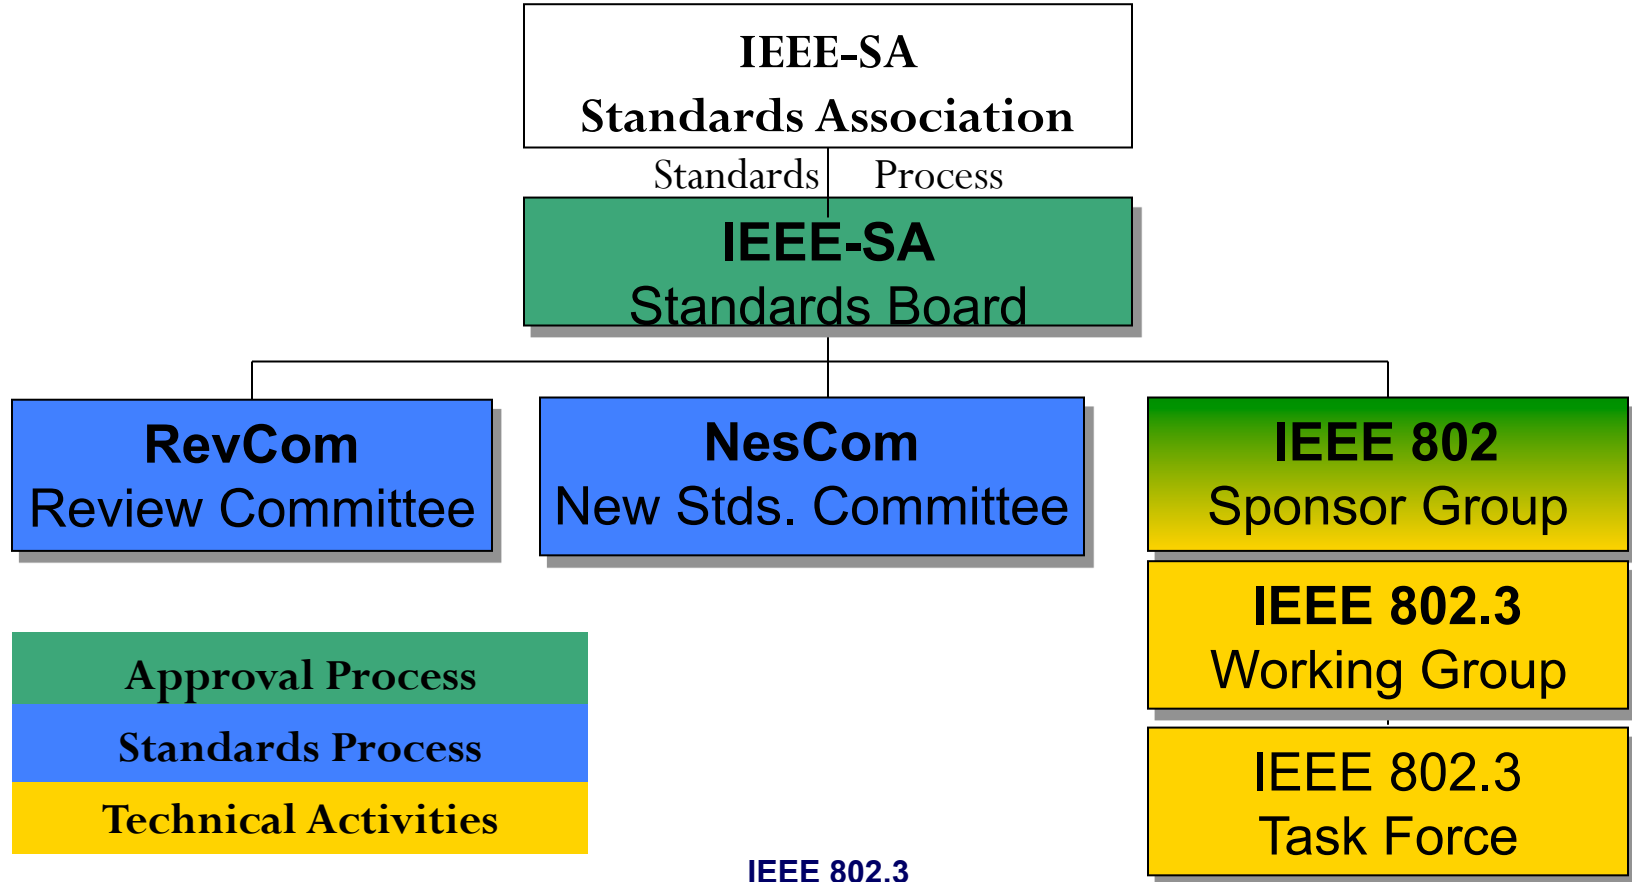

Ground Rules

- Based upon IEEE 802.3 Rules
 - Foundation based upon Robert's Rules of Order
 - Anyone in the room may speak
 - Anyone in the room may vote
- **RESPECT**... give it, get it
- NO product pitches
- NO corporate pitches
- NO prices!!!
 - This includes costs, ASPs, etc. no matter what the currency
- NO restrictive notices

Attendance

- Tutorial Material on attendance tool

Participants, Patents, and Duty to Inform

All participants in this meeting have certain obligations under the IEEE-SA Patent Policy.

- **Participants [Note: Quoted text excerpted from IEEE-SA Standards Board Bylaws subclause 6.2]:**
 - **“Shall inform the IEEE (or cause the IEEE to be informed)” of the identity of each “holder of any potential Essential Patent Claims of which they are personally aware” if the claims are owned or controlled by the participant or the entity the participant is from, employed by, or otherwise represents**
 - **“Should inform the IEEE (or cause the IEEE to be informed)” of the identity of “any other holders of potential Essential Patent Claims” (that is, third parties that are not affiliated with the participant, with the participant’s employer, or with anyone else that the participant is from or otherwise represents)**
- **The above does not apply if the patent claim is already the subject of an Accepted Letter of Assurance that applies to the proposed standard(s) under consideration by this group**
- **Early identification of holders of potential Essential Patent Claims is strongly encouraged**
- **No duty to perform a patent search**

Patent Related Links

All participants should be familiar with their obligations under the IEEE-SA Policies & Procedures for standards development.

Patent Policy is stated in these sources:

Call for Potentially Essential Patents

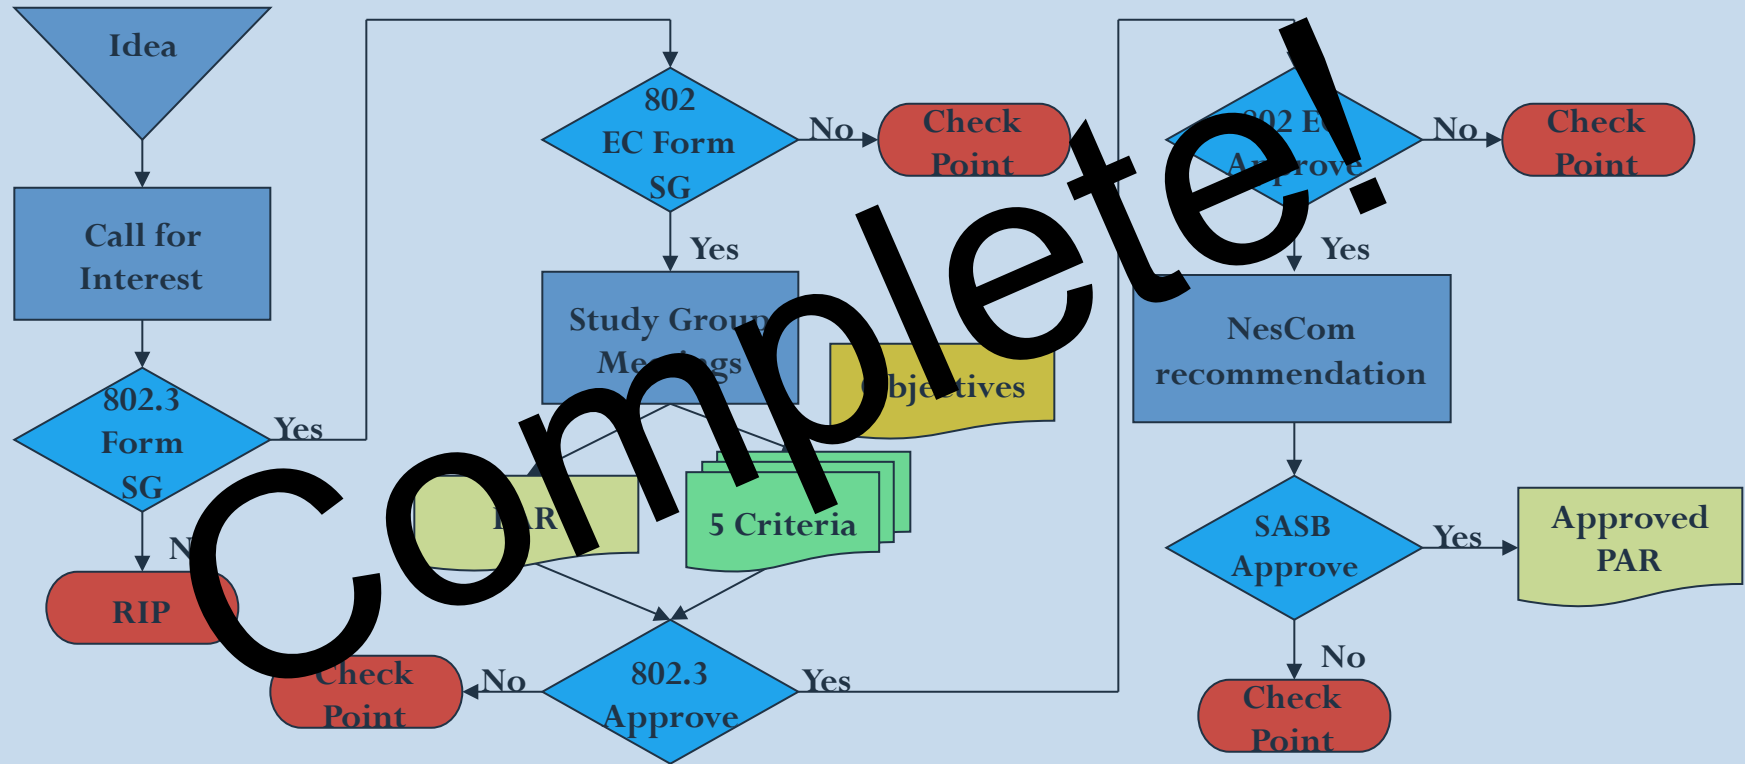

- If anyone in this meeting is personally aware of the holder of any patent claims that are potentially essential to implementation of the proposed standard(s) under consideration by this group and that are not already the subject of an Accepted Letter of Assurance:
 - Either speak up now or
 - Provide the chair of this group with the identity of the holder(s) of any and all such claims as soon as possible or
 - Cause an LOA to be submitted

Other Guidelines for IEEE WG Meetings

- **All IEEE-SA standards meetings shall be conducted in compliance with all applicable laws, including antitrust and competition laws.**
 - **Don't discuss the interpretation, validity, or essentiality of patents/patent claims.**
 - **Don't discuss specific license rates, terms, or conditions.**
 - Relative costs, including licensing costs of essential patent claims, of different technical approaches may be discussed in standards development meetings.
 - Technical considerations remain primary focus
 - **Don't discuss or engage in the fixing of product prices, allocation of customers, or division of sales markets.**
 - **Don't discuss the status or substance of ongoing or threatened litigation.**
 - **Don't be silent if inappropriate topics are discussed ... do formally object.**

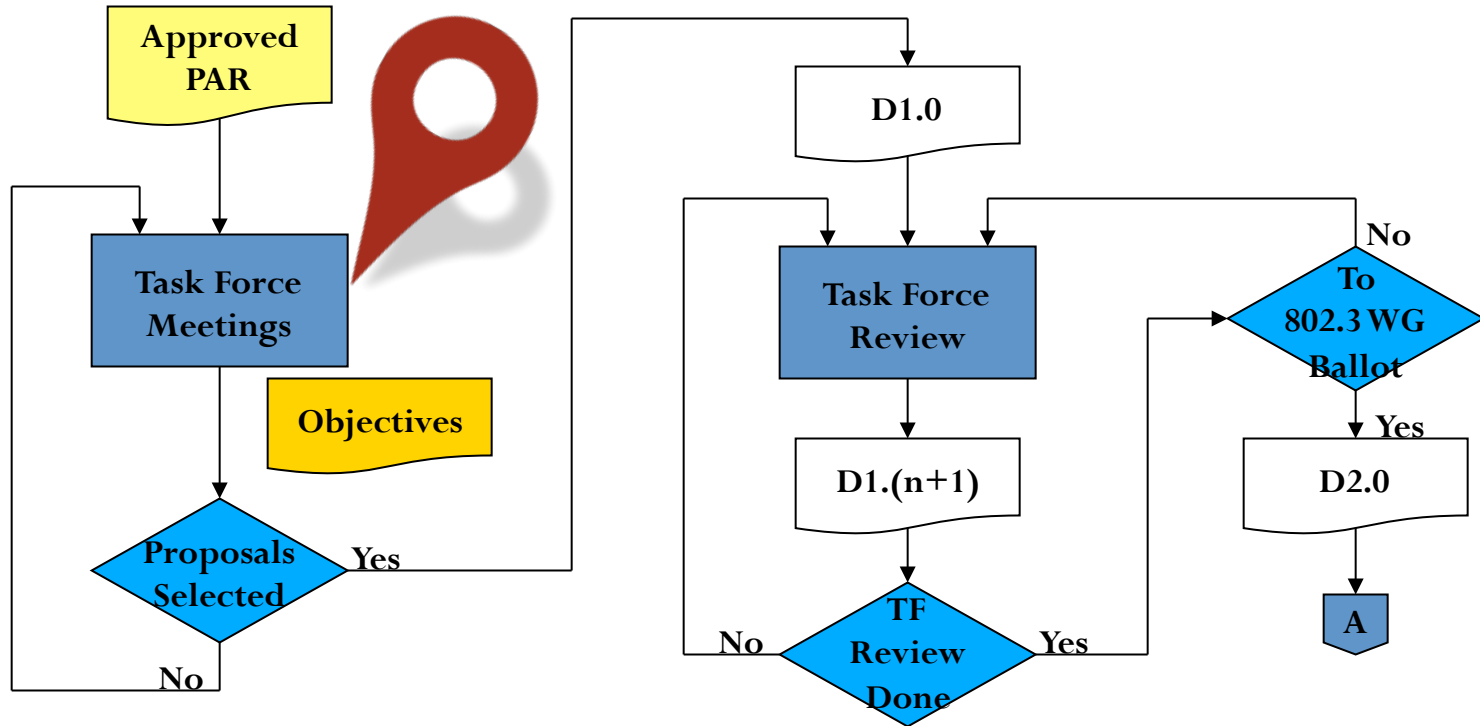

See *IEEE-SA Standards Board Operations Manual*, clause 5.3.10 and “Promoting Competition and Innovation: What You Need to Know about the IEEE Standards Association's Antitrust and Competition Policy” for more details.

Ad hocs

Chartering the ad hoc for new Task Force:

Charter: to discuss topics towards supporting the developed objectives, PAR and CSD or for providing the Task Force with contributions to help it prepare for future decisions.

- Timeline
 - Not yet

Objectives 1 of 2

- Support full-duplex operation only
- Preserve the Ethernet frame format utilizing the Ethernet MAC
- Preserve minimum and maximum FrameSize of current IEEE 802.3 standard
- Support optional Energy-Efficient Ethernet operation
- Provide appropriate support for OTN
- Support a MAC data rate of 50 Gb/s and 100 Gb/s
- Support a BER of better than or equal to 10^{-12} at the MAC/PLS service interface (or the frame loss ratio equivalent) for 50 Gb/s and 100 Gb/s operation
- Support a MAC data rate of 200 Gb/s
- Support a BER of better than or equal to 10^{-13} at the MAC/PLS service interface (or the frame loss ratio equivalent) for 200 Gb/s operation

Objectives 2 of 2

50 Gb/s Ethernet PHYs

- Define single-lane 50 Gb/s PHYs for operation over
 - copper twin-axial cables with lengths up to at least 3m.
 - printed circuit board backplane with a total channel insertion loss of $\leq 30\text{dB}$ at 13.28125 GHz.
 - MMF with lengths up to at least 100m
 - SMF with lengths up to at least 2km
 - SMF with lengths up to at least 10km

100 Gb/s Ethernet PHYs

- Define a two-lane 100 Gb/s PHY for operation over copper twin-axial cables with lengths up to at least 3m.
- Define a two-lane 100 Gb/s PHY for operation over a printed circuit board backplane with a total channel insertion loss of $\leq 30\text{dB}$ at 13.28125 GHz.
- Define a two-lane 100 Gb/s PHY for operation over MMF with lengths up to at least 100m

200 Gb/s Ethernet PHYs

- Define four-lane 200 Gb/s PHYs for operation over
 - copper twin-axial cables with lengths up to at least 3m.
 - printed circuit board backplane with a total channel insertion loss of $\leq 30\text{dB}$ at 13.28125 GHz.
- Define 200 Gb/s PHYs for operation over MMF with lengths up to at least 100m

Procedural update

- We're a Task Force!
 - IEEE P802.3cd
- PAR approved by 802.3WG and 802 EC in Macau
- Final IEEE-SA Standards Board approval May 16th

From here to a standard**

Now that the Task Force has been formed, the steps that have to be completed are:

- Adopt baselines needed to fulfill the objectives
- Create initial draft version (D1.0)
- Task Force review (D1.x)
- Working Group ballot (D2.x)
- Sponsor ballot (D3.x)
- Final approvals & publication

** completely plagiarized from the excellent presentation by Pete Anslow

http://www.ieee802.org/3/by/public/Jan15/anslow_3by_01_0115.pdf

Baselines

http://www.ieee802.org/3/by/public/Jan15/anslow_3by_01_0115.pdf

- For a project defining a new Ethernet rate a new set of clauses and associated annexes will need to be generated for almost all of the sublayers on the previous slide. The style and some of the content for these new clauses and annexes will, however, likely be derived from existing 802.3 clauses and annexes.
- The major technical details for each of these clauses and annexes is defined via a set of baseline documents which the proponents put together and try to gain consensus for.
- Baselines can contain some “TBD” elements, but these should be kept to a minimum.
- Each of the baseline documents is then adopted by a motion of the Task Force (requiring $\geq 75\%$ approval as they are technical).
- The baselines are the basis for the draft specification so they need to include enough information for the editors to be able to create a draft.

More on Baselines

http://www.ieee802.org/3/by/public/Jan15/anslow_3by_01_0115.pdf

- A baseline proposal must contain sufficient detail so that an editor can draft text without having to infer any significant technical material
 - Baseline proposals must be complete and definitive
- A baseline proposal should have a limited scope
 - They typically address one objective or one sublayer
 - A consistent set of baselines may be adopted in the same meeting
- A baseline proposal must meet all of the Criteria for Standards Development (CSD)
- It is ok for competing proposals for the same item to be developed in parallel
 - The best proposals will gain the most support with time

Even More on Baselines for 802.3cd

- A number of the baselines/clauses for IEEE P802.3cd are expected to strongly leverage P802.3bs work
- Our industry will be looking for consistency between technology building blocks for the multiple applications specified in IEEE P802.3bs and P802.3cd
- Therefore a baseline proposal that proposes maintaining consistency with P802.3bs' equivalent work while identifying the specific changes for P802.3cd would meet the requirement of:
 - "...must contain sufficient detail so that an editor can draft text without having to infer any significant technical material"

Timeline TBD

Task Force	TF Formed	Baselines adopted	TF Review Complete	WG Ballot complete
IEEE 802.3ba	1/2008	+6 months	+6 months	+8 months
IEEE 802.3bj	9/2011	+8 months	+10 months	+8 months
IEEE 802.3bm	9/2012	+8 months	+6 months	+6 months
IEEE 802.3bs*	5/2014	+14 months	+12 months	+8 months
IEEE 802.3by	1/2015	0 months	+6 months	+4 months
IEEE 802.3cd	5/2016	TBD	TBD	TBD

Project duration strongly dependent on many factors:

- Maturity of technology being specified
- Ability to leverage existing IEEE work
- Industry consensus

IEEE 802.3cd goal to review (adopt?) a timeline in July

* In progress

Goals for the meeting

- Review technical contributions
- Build, assess consensus on proposals
- Consider making some decisions:
 - Baselines
 - New Objectives
 - Nomenclature
- Establish work items for July Meeting

Future Meetings & Ad hocs

- Ad-hoc meeting plans
 - Single on-going biweekly meetings, all topics (will cycle) – agendas will be published. 2hr duration.
 - Wed 8-10 Pacific
- See: <http://www.ieee802.org/meeting/index.html>
- July 2016 Plenary
 - Week of July 24th, 2016 – San Diego, CA
- Sept 2016 Interim
 - Week of Sept 12th, 2016 – Fort Worth, Tx
- November 2016 Plenary
 - Week of Nov 7th, 2016 – San Antonio, Tx
- Anyone interested in hosting a interim meeting contact me or the IEEE 802.3 Executive Secretary Steve Carlson.

Thank You!
