Many of the editing instructions deviate from the required format.

These are:

The editing instructions contained in this amendment define how to merge the material contained
therein into the existing base standard and its amendments to form the comprehensive standard.

The editing instructions are shown in bold italic. Four editing instructions are used: change, delete, insert,
and replace. Change is used to make corrections in existing text or tables. The editing instruction specifies
the location of the change and describes what is being changed by using strikethrough (to remove old mate-
rial) and underscore (to add new material). Delete removes existing material. Insert adds new material with-
out disturbing the existing material. Deletions and insertions may require renumbering. If so, renumbering
instructions are given in the editing instruction. Replace is used to make changes in figures or equations by
removing the existing figure or equation and replacing it with a new one. Editing instructions, change mark-
ings, and this NOTE will not be carried over into future editions because the changes will be incorporated
into the base standard.

SuggestedRemedy

Check all editing instructions and make sure they start with any of
- Insert
- Change
- Delete
- Replace

Normally figures are replaced, not modified. This one looks like a local change that is worth an exception to the rule, but it should be made clear what changes are made.

The suggested remedy assumes the figure labels are changed per another comment. If they are not, the instruction should be "Inthe the third part of Figure 145-13..." instead.

SuggestedRemedy

Add to the editorial instruction:

In the resulting Figure 145-13c, change the text inside state CLASS_EV1_LCE as follows:

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE.

Add to the editorial instruction:

In Figure 145-13, change the text inside state CLASS_EV1_LCE as follows:

Cl **145**   *SC* **145.2.5.7**   *P* **24**   *L* **2**   # 21

Ran, Adee   Intel
Comment Type   **E**   *Comment Status* **R**

The editorial instruction refers to Table 145-13. In 802.3bt, there are six figures with this number (continued figure). This looks like the third one.

It would be good to have a separate label for each of the three figures, to enable better referencing by readers. (This has precedence for example in clause 36 PCS Receive state diagram, which is separated to Figure 36–7a, Figure 36–7b, and Figure 36–7c).

Another comment refers to the specific change.

SuggestedRemedy

I suggest the instruction:

Change the six parts of Figure 145–13 to create separate labels Figure 145–13a through Figure 145–13f (figures with no changes other than re-labeling are not shown).

Response   *Response Status* **C**

REJECT.

You are suggesting a modification to 802.3 style. This needs taken up with 802.3. The CRG has no issue dealing with a multipage figure. No concensus for change.

Cl **145**   *SC* **145.2.5.7**   *P* **25**   *L* **1**   # 45

Yseboodt, Lennart   Signify
Comment Type   **E**   *Comment Status* **R**

Figure 145-14 (Autoclass state diagram on the PSE side) has been extensively modified. The editing instruction says "Modify Figure 145-14 as follows".

There are missing underlines in the MEASURE_ACS_DONE state.

SuggestedRemedy

Describing changes to a Figure are tricky using just underlines and strikethroughs. When new states are added, I think it is much better to say "Replace Figure 145-14 as follows" and not have underlines/change instructions in there.
This is much easier and not ambiguous when the time comes to merge this into a new base standard.

Change editing instruction to "Replace" and remove underlines in Figure 145-14.

Response   *Response Status* **C**

REJECT.

The modifications were made in underline and strikethrough to illuminate the changes. Replacing the figure forces a reader to compare the old and new figures, which could lead to missing some of the modifications. No concensus for change.

Ran, Adee　　　　　　　　　　　Intel

Comment Type　**E**　　　*Comment Status*　**A**

Equations should be replaced, not modified, as changes can't be marked.

SuggestedRemedy

Change the instruction to "Replace Equation 145-4 with the following equation:"

Response　　　　　　*Response Status*　**C**

ACCEPT.

Cl **145**　　　*SC* **145.2.8**　　　　　*P* **27**　　　*L* **4**　　　# 46

Yseboodt, Lennart　　　　　　　　　Signify

Comment Type　**E**　　　*Comment Status*　**A**

"Modify Equation 145-4 as shown:"

The change is not visible.
Like with figures, maybe even more so, marking up changes in equations is nigh impossible.

SuggestedRemedy

Change editing instruction to "Replace Equation 145-4 as follows:"

Response　　　　　　*Response Status*　**C**

ACCEPT IN PRINCIPLE.

"The PSE shall limit class event currents to I Class_LIM and shall limit mark event currents to I Mark_LIM."

I assume this to mean the total current. That would make sense.
What about a PSE doing classification of a dual-sig PD in parallel ? It might get close to hitting 90mA total current if both pairsets are showing class signature 4.

This requirement seems not to have considered that particular case.
I'm not sure we even want to touch this.

SuggestedRemedy

IF a fix is needed, we'll need some ugly language to describe parallel classification.

Response   *Response Status* **C**

REJECT.

No specific remedy provided by commentor. No concensus for change.

Ran, Adee   Intel

Comment Type **E**   *Comment Status* **A**

It seems that the only change in figure 145-25 is in the text in state DO_CLASS_EVENT_AUTO.

If this is correct, it should be noted in the editorial instruction. If there are other changes, please list them in addition.

Consider replacing the figure it there are changes in anything other than text.

SuggestedRemedy

Change the editorial instruction to "In the resulting Figure 145-25a, change the text inside state DO_CLASS_EVENT_AUTO as follows:"

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE.

Small changes to large diagrams are hard to find with a figure replacement. The CRG has decided to highlight the changes with modification instructions for ease of balloting. The figures will be replaced with the 'clean' version for the first recirculation of SA Ballot.

Editor granted license to add this note to the draft. No other changes result from this comment.

Cl **145**   *SC* **145.3.3.3.5**   *P* **28**   *L* **1**   # 26

Ran, Adee   Intel

Comment Type **E**   *Comment Status* **R**

In figure 145-25, as noted in another comment, it would be good to use separate labels for the two parts.

Another comment refers to the specific change.

SuggestedRemedy

I suggest the instruction:

Change the two parts of Figure 145–25 to create separate labels Figure 145–25a and Figure 145–13b (figures with no changes other than re-labeling are not shown).

Response   *Response Status* **C**

REJECT.

You are suggesting a modification to 802.3 style. This needs taken up with 802.3. The CRG has no issue dealing with a multipage figure. No concensus for change.

Is there any change in the second part of the figure? If not, including it will likely confuse many readers.

SuggestedRemedy

List the changes in the editorial instruction, or omit the second figure.

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE.

Editor to confirm no changes to figure on page 29. Delete if no changes. If changes, add change bars and editing notation.

Cl **145**   *SC* **145.3.3.3.5**   *P* **30**   *L* **1**   # 29

Ran, Adee   Intel

Comment Type   **E**   *Comment Status* **A**

The change to Figure 145-26 is a major one - new states are added. The figure should be replaced, not changed.

The suggested remedy describes the changes for the benefit of readers, but as this description will not affect the revision document, it may be omitted.

If there are additional changes they should also be listed.

SuggestedRemedy

Change the editorial instruction to "Replace Figure 145-26 with the following figure, which includes additional states CANCEL1_ACS and CANCEL2_ACS."

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE.

Editor to add underline/strikethrough as necessary to 145-26 (similar to 145-14).

On line 1, change: "Modify Figure 145-14"..." to "Change Figure 145-14…

Cl **145**   *SC* **145.3.3.3.5**   *P* **31**   *L* **1**   # 30

Ran, Adee   Intel

Comment Type   **E**   *Comment Status* **A**

For Figure 145-27, apply changes per other comments (re-label continued figure, indicate specific text changes in editorial instruction, use "replace" instead of "change" if there are changes other that in text)

SuggestedRemedy

Implement with editorial license.

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE.

Change: "Modify Figure 145-27..."
to: "Change Figure 145-27..."

Cl **145**   *SC* **145.3.6.2**   *P* **31**   *L* **50**   # 31

Ran, Adee   Intel

Comment Type   **T**   *Comment Status* **A**

The added text is confusing. I assume it is a description of a condition and its meaning (indication) but it can be read as if there should be some external indication.

Suggested remedy is a rephrasing assuming I understood correctly. If not, please rephrase as required.

SuggestedRemedy

Change the added text to:

If a PD draws less than Class 1 power during the period bounded by T_AUTO_PD1 and T_AUTO_PD2, the PSE should determine the power allocation by the assigned Class, instead of using the Physical Layer Autoclass procedure.

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE.

Replace the text:
"A PD that draws less than Class 1 power during the period bounded by TAUTO_PD1 and TAUTO_PD2 indicates to the PSE that the power allocation should be determined by the assigned Class. By doing this the PD can abort the Physical Layer Autoclass procedure."

With:
"A PD that draws less than PClass_PD (ed note: subscript 'Class_PD') max for Class 1 during the period bounded by TAUTO_PD1 and TAUTO_PD2 indicates to the PSE that the power allocation should be determined by the assigned Class. By doing this, the PD can abort the Physical Layer Autoclass procedure."

All text changes in Figure 145–41 should be listed in the editorial instruction.

SuggestedRemedy

Change the editorial instruction to
"In Figure 145-41, change the text in state IDLE and the text in the transition from MEASURE to AUTOCLASS as follows:"

Response　　　　　*Response Status*　**C**

ACCEPT IN PRINCIPLE.

Change:
"Modify Figure 145-41 to add assignment of ac_measurement_completed as follows:"
to:
"Change Figure 145-41 as follows:"

Cl **145**　　*SC* **145.5.3.2.5**　　　　*P* **35**　　　*L* **1**　　　# `33`

Ran, Adee　　　　　　　　　　　Intel
Comment Type　**E**　　　*Comment Status*　**A**

I could not identify what has changed in Figure 145–42.

The existing text is barely readable.

SuggestedRemedy

Please list all text changes in Figure 145–42 in the editorial instruction, or change the instruction to "replace" if necessary.

Consider increasing the font size.

Response　　　　　*Response Status*　**C**

ACCEPT IN PRINCIPLE.

Add change bar to figure to point to the change (which is on the transition from PSE_POWER_REVIEW to UCT).

change editing instruction from:
"Modify Figure 145-42 as shown:"
to: "Change Figure 145-42 as shown:"

We follow the IEEE style guide for minimum font sizes. No change.

Ran, Adee　　　　　　　　　　　Intel
Comment Type　**E**　　　*Comment Status*　**A**

"used in the PD state diagrams; defined in Figure 145–25" - it is one state diagram in multiple figures, not the other way around, and the semicolon is out of place.

Looking at the figure, there is no mention of pd_initial_value in it - the definition is only here, based on the variables which are defined in 145.3.3.3.2. The reference to the figure is unnecessary and confusing.

SuggestedRemedy

Change to "used in the Single-signature PD state diagram (Figure 145-25a)"

Or delete this phrase altogether.

Response　　　　　*Response Status*　**C**

ACCEPT IN PRINCIPLE.

Change to "used in the Single-signature PD state diagram (Figure 145-25)"
