

IEEE P802.3cz Strawpolls

John D'Ambrosia, Futurewei, US Subsidiary of Huawei
David Law, HPE

15 December 2021

Introduction

- **The following presentation provides the straw polls noted after the presentation of dambrosia_3cz_01_301121.pdf on 30 Nov.**

Straw Poll

- **I believe that the earliest a technically complete IEEE P802.3cz draft, specifying operation over 40m of graded Index Glass Optical Fiber could be generated by:**
 - **Mar 2022**
 - **July 2022**
 - **Nov 2022**
 - **Mar 2023**
 - **Later than above**

Straw Poll

- **I believe that the earliest a technically complete IEEE P802.3cz draft, specifying operation over a reach less than 40m over graded Index Plastic Optical Fiber (GIPOF), could be generated by:**
 - **Mar 2022**
 - **July 2022**
 - **Nov 2022**
 - **Mar 2023**
 - **Later than above**

Straw Poll

■ I would support the following -

- a. The Project should specify operation over**
 - Graded index glass optical fiber
- b. The Project should specify operation over**
 - Graded index glass and plastic optical fiber

– Results

- a
- b
