

Straw Polls

IEEE 802.3cz TF

June 22nd 2021

Straw Poll #1

I will support x number of PMDs for each data rate:

- a) 1**
- b) 2**
- c) 3**
- d) More than 3**

Results:

- a) 27/55**
- b) 5/55**
- c) 4/55**
- d) 13/55**

No answer: 6/55

Straw Poll #2

Chicago rules

Technical feasibility has been demonstrated for PMDs at $\leq 10\text{G}$ supporting 40m links with 4 in-line connectors for:

- a) Short wavelength VCSEL on GI-POF**
- b) Short wavelength VCSEL on OM3**
- c) Long wavelength SiP on OM3**
- d) Long wavelength SiP on GI-POF**

Results:

a) 24/55

b) 33/55

c) 16/55

d) 16/55

No answer 7/55

Straw Poll #3

Chicago rules

Technical feasibility has been demonstrated for PMDs at $\leq 25\text{G}$ supporting 40m links with 4 in-line connectors for:

- a) Short wavelength VCSEL on GI-POF**
- b) Short wavelength VCSEL on OM3**
- c) Long wavelength SiP on OM3**
- d) Long wavelength SiP on GI-POF**

Results:

a) 14/55

b) 33/55

c) 16/55

d) 13/55

No answer 8/55

Straw Poll #4

Chicago rules

Technical feasibility has been demonstrated for PMDs at $\leq 50\text{G}$ supporting 15m links with 2 in-line connectors for:

- a) Short wavelength VCSEL on GI-POF**
- b) Short wavelength VCSEL on OM3**
- c) Long wavelength SiP on OM3**
- d) Long wavelength SiP on GI-POF**

Results:

a) 5/55

b) 32/55

c) 13/55

d) 9/55

No answer 15/55

Straw Poll #5

Chicago rules

Economic feasibility has been demonstrated for PMDs at $\leq 10\text{G}$ supporting 40m links with 4 in-line connectors for:

- a) Short wavelength VCSEL on GI-POF**
- b) Short wavelength VCSEL on OM3**
- c) Long wavelength SiP on OM3**
- d) Long wavelength SiP on GI-POF**

Results:

a) 24/57

b) 32/57

c) 10/57

d) 12/57

No answer 11/57

Straw Poll #6

Chicago rules

Economic feasibility has been demonstrated for PMDs at $\leq 25\text{G}$ supporting 40m links with 4 in-line connectors for:

- a) Short wavelength VCSEL on GI-POF**
- b) Short wavelength VCSEL on OM3**
- c) Long wavelength SiP on OM3**
- d) Long wavelength SiP on GI-POF**

Results:

a) 17/56

b) 33/56

c) 10/56

d) 12/56

No answer 9/56

Straw Poll #7

Chicago rules

Economic feasibility has been demonstrated for PMDs at $\leq 50\text{G}$ supporting 15m links with 2 in-line connectors for:

- a) Short wavelength VCSEL on GI-POF**
- b) Short wavelength VCSEL on OM3**
- c) Long wavelength SiP on OM3**
- d) Long wavelength SiP on GI-POF**

Results:

a) 7/56

b) 31/56

c) 11/56

d) 10/56

No answer 13/56

Straw Poll #8

Chicago rules

I will support a PMD based on the following:

- a) 2.5, 5, 10 and 25G at 40m with 4 in-line connectors**
- b) 2.5, 5, 10 and 25G at 15m with 4 in-line connectors**
- c) 50G, 15m, 2 in-line connectors**

Results:

a) 27/56

b) 31/56

c) 35/56

No answer 8/56

Straw Poll #9

I will support a PMD based on the following wavelength:

- a) 850nm**
- b) 980nm**
- c) 1310nm**
- d) No preference**

Results:

- a) 16/55**
- b) 12/55**
- c) 9/55**
- d) 13/55**

No answer: 5/55
