Page 1 of 1

- The number of comments has decrease a lot (287 to 59)
- Many of the comments received may be considered “out-of-scope”, but some of them deserve to be discussed

Motion #1

Move to consider the 26 late comments received in the TF comment resolution.

(Technical $\geq 75\%$)

Mover: Luisma Torres

Seconder:

Y / N / A

Pass/Fail

Comment Resolution Roadmap

- Due to the number of comments, the editor's proposal is to review the comments received one by one in page and line order, regardless of other considerations.
- Comment #33 about a proposal to include aging effects in the draft is supported with a presentation available in our website.
(https://www.ieee802.org/3/cz/public/jul_2022/perezaranda_3cz_01_0722_fiber_aging.pdf)
- On 26 June, IEEE 802.3 WG Chair assigned amendment number 7 to our project.
 - The 802.3cz amendment number will be updated in IEEE 802.3cz/D2.2.
- The expectation is we will request 802.3 and Executive Committee conditional approval to proceed to Standards Association ballot this week.
 - D2.2 will include the implementation of all remedies approved during this week's comment resolution.
 - D2.2 will be submitted for Mandatory Editorial Coordination.
 - A 2nd WG recirculation ballot will be conducted on D2.2.
 - A 3rd WG recirculation ballot will be conducted only if valid new disapprove comments are received on D2.2

Thanks to the commenters!

Please keep on commenting and improving our Draft

Next Steps

- P802.3cz/D2.2 expected to be generated by 22 July with the comment resolution discussed in these sessions.
- The TF may request conditional approval to proceed to Standards Association ballot with P802.3cz/D2.2.

Thanks!
