Comment Type E Comment Status D 10BASE-T1S

"and optional provision of power over single balanced pair multidrop mixing segments based on the 10BASE-T1S specified in Clause 147 of IEEE Std 802.3-2022" doesn't read right, it sounds like the Provision of power is based on clause 147

SuggestedRemedy

Replace Amendment description with "Amendment X- This amendment includes changes to IEEE Std 802.3-2022 and adds Clause 168 and Clause 169. This amendment adds Physical Layer specifications and management parameters for enhancement of multidrop 10 Mb/s operation based on the 10BASE-T1S PHY specified in Clause 147 of IEEE Std 802.3-2022, and specifies optional provision of power over single balanced pair mixing segments.

Proposed Response Response Status W

Cl 1 SC 1.4 P21 L21 # 178

Jones, Chad Cisco Systems, Inc.

Comment Type E Comment Status D Editorial

We need a definition for MPI.

SuggestedRemedy

add a new 1.4.405b (and renumber existing 1.4.405b to 1.4.405c): Multidrop Power Interface (MPI): The mechanical and electrical interface between the Multidrop Power Sourcing Equipment (MPSE) or Multidrop Powered Device (MPD) and the transmission medium.

This purely copies the PI definition. do we need to replace "transmission medium" with "mixing segment"?

Proposed Response Response Status W

PROPOSED ACCEPT IN PRINCIPLE.
Implement commenter's suggested text with "transmission medium". The mixing segment may or may not be the transmission medium for the power, but transmission medium fits both.

add a new 1.4.405b (and renumber existing 1.4.405b to 1.4.405c): Multidrop Power Interface (MPI): The mechanical and electrical interface between the Multidrop Power Sourcing Equipment (MPSE) or Multidrop Powered Device (MPD) and the transmission medium.

Register 45.2.3.1.2 doesn't reference clause 168 or even clause 147. This needs fixing.

SuggestedRemedy

Add 45.2.3.1.2 to the draft, with an instruction to change as follows: (indicates underline start or stop)

"When the 10BASE-T1M/S, 100BASE-T1, any MultiGBASE-T, or the 5/10GBASE-R mode of operation is selected for the PCS using the PCS type selection field (3.7.3:0), the PCS shall be placed in a loopback mode of operation when bit 3.0.14 is set to a one. When bit 3.0.14 is set to a one, the 10BASE-T1M/S, 100BASE-T1, 5/10GBASE-R, or any PCS in the MultiGBASE-T set shall accept data on the transmit path and return it on the receive path. The speed of the loopback is selected by the PCS control 1 (register 3.0) defined in 45.2.3.1. The specific behavior of the 10BASE-T1S PCS during loopback is specified in 147.3.4.

The specific behavior of the 10BASE-T1M PCS during loopback is specified in 168.4.4.

the 100BASE-T1 PCS during loopback is specified in 96.3.5. The specific behavior of the 5/10GBASE-R

PCS during loopback is specified in 49.2. The specific behavior for the 10GBASE-T PCS during loopback is

specified in 55.3.7.3. The specific behavior for the 25GBASE-T and 40GBASE-T PCS during loopback is

specified in 113.3.7.3. The specific behavior for the 2.5GBASE-T or 5GBASE-T PCS during loopback is

specified in 126.3.7.3. For all other port types, the PCS loopback functionality is not applicable and writes to

this bit shall be ignored and reads from this bit shall return a value of zero."

CI 148 SC 148.4.4.6 P42 L4 # 265

Baggett, Tim Microchip

Comment Type E Comment Status D Editorial

CI 1.2: Qualifiers described by short phrases are enclosed in parentheses. The Term "ldplca_en" should be enclosed in parenthesis. More examples are identified in the PDF related to this comment.

SuggestedRemedy

See Baggett_3da_D1p2_CL148_StateDiagrams.pdf and enclose highlighted terms with parenthesis.

This change applies to:

Fig 148-3 P42

Fig 148-4 P43

Fig 148-8 P50

In general, if the transition contained only a single boolean term such as "!variable" or "variable = CONST" I then left it alone and unhighlighted as this seemed to be consistent and more readable.

Proposed Response Response Status W

PROPOSED REJECT.

While the commenter is correct that this is the guidance in clause 1.2, the style in most of IEEE Std 802.3 does not follow this. This goes way back, see, e.g. Figures 33-9, 36-5, 36-7, 46-11, 48-8, 55-15, 97-12, etc..

CI 148 SC 148.4.4.6 P42 L26 # 166

Jones, Chad Cisco Systems, Inc.

Comment Type E Comment Status D Editorial

off page connectors are not consistent. On page 42, they have arrows into the pentagon, on page 43 they do not. Looking at Clause 145, the convention should be to have the arrow head. Therefore, they need added to Figure 148-4 part b in 4 places
We could decide to remove the arrows, but that means all my follow on comments will have to be AIP and swapped to give instructions to remove the arrowheads that I am not commenting on.

SuggestedRemedy

add arrowheads to the lines going to the off page connectors in 4 places:
pg 43, line 18 ("C"); line 22 ("B"); line 29 ("D"); line 52 ("B")

Proposed Response Response Status W

PROPOSED REJECT.

This is in the base standard. Convention is arrowhead into inverted pentagon. (point up). See, e.g., clause 82 (40GBASE-R) or similar optical "Pete Anslow" clauses...

Suggest we don't change, but can do it on revision, or if figure is redrawn.

Editor's comment - TFTD

CI 168 SC 168.9 P84 L30 # 258

Brandt, David Rockwell Automation

Comment Type E Comment Status D TCI

Possibly I don't understand the examples. It is stated that "[1] The TCI may physically be implemented as a two-conductor connection to the DTE or [2] as an adapter separate from the DTE's PMA assembly or [3] the TCI and the PMA of the DTE may be located within a single assembly." then we state "The latter configuration presents a negligible stub length when the PMA attachment is open circuit." It is unclear how in [3], the PMA can be separated. I would read [1] as a T with some drop to the DTE, [2] as a kind of DTE plug with TC1/TC1 and no drop, and [3] as TC1 and TC2 built into the DTE.

SuggestedRemedy

Suggest "The second configuration may present a negligible stub length when the PMA attachment is open circuit."

Proposed Response Response Status W

PROPOSED ACCEPT IN PRINCIPLE.

(note - this changes "latter" to "second", rewriting the sentence with number labels as the commenter has done in the comment to improve clarity):

Change P84 L30-33 to read:

"The TCI may physically be implemented as: (1) a two-conductor connection to the DTE, or (2) an adapter separate from the DTE's PMA assembly, or (3) integrated, where the TCI and the PMA of the DTE are located within a single assembly. The second configuration presents a negligible stub length when the PMA attachment is an open circuit. The third configuration must be replaced to allow connectivity when the DTE is not present. Either..."

Comment Type TR Comment Status D LATE

Error in equation 168-5

SuggestedRemedy

Change equation 168-5.

IL ≤ 0.16 dB 1 $\leq f < 10$

$-0.454 + (0.22/f) + 0.63 \cdot \text{SQRT}(f) - 0.18 \cdot f + 0.004 \cdot f^2$ 10 $\leq f \leq 24$

IL ≤ 0.3 $\leq f < 1$ (TBD)

$24 < f \leq 40$ (TBD)

f=MHz

See diminico_SPMD_01_0624.pdf for TBD

Proposed Response Response Status W

PROPOSED ACCEPT IN PRINCIPLE.

This is a LATE comment; however, it fixes an error in an important equation that was found late. Recommend TF to consider it.

Change Equation 168-5 to read:

IL ≤ 0.6 dB 0.3 $\leq f < 1$

IL ≤ 0.16 dB 1 $\leq f < 10$

IL $\leq -0.454 + (0.22/f) + 0.63 \cdot \text{SQRT}(f) - 0.18 \cdot f + 0.004 \cdot f^2$ 10 $\leq f \leq 24$

where f is the frequency in MHz.

TF to consider presentation (Editor has not reviewed) on requirements between 0.3 MHz and 1 MHz; proposed response is based on simplification of email discussion with submitter, and attempts to simplify the requirement rather than model a circuit.

need an "if" before "short_circuit_detected is true" but I think this is better as a bulletized list.

SuggestedRemedy
either add to "...if overload_detected is TRUE, IF short_circuit_detected is TRUE, or if..."
OR
bulletize:
full operating voltage shall be removed from the TCI for any of the following reasons:
*in the absence of the MPD MPS
*if overload_detected is TRUE
*if short_circuit_detected is TRUE
*if commanded to do so by a management entity.

Proposed Response Response Status W

PROPOSED ACCEPT IN PRINCIPLE.
Change to read:
full operating voltage shall be removed from the TCI for any of the following reasons:
*in the absence of the MPD MPS
*if overload_detected is TRUE
*if short_circuit_detected is TRUE
*if commanded to do so by a management entity.

last cycle we changed MPS to TPS (likely an attempt to prevent confusing MPS and MPSE). I don't mind either term but we need to pick one and be consistent. The PSE section had MPS.

SuggestedRemedy

Either search document for MPS and replace with TPS, with editorial license to adjust any text around (i.e. to replace "maintain" with "transmit" as needed)

OR

replace transmit with maintain and TPS with MPS in this section, with editorial license to adjust any other occurrences of TPS outside of 169.5.5.3. (search implies TPS is only found in 169.5.5.3)

Proposed Response Response Status W

PROPOSED ACCEPT IN PRINCIPLE.

(we did agree to go with TPS)

search document for MPS and replace with TPS, with editorial license to adjust any text around (i.e. to replace "maintain" with "transmit" as needed)
