

Electrical Interface and Electrical PHY Baseline Status

Kent Lusted, Intel Corporation
IEEE P802.3dj Electrical Track Chair

Introduction

- There is a growing list of contributions on electrical interfaces and electrical PHYs
- Progress being made on a number of topics
- How to focus the progress towards adoptable baseline proposals?

Status – 3 July 2023

	200G/L AUI C2M	200G/L AUI C2C	200G/L CR	200G/L KR
Channels Contributed				
Channels selected				
COM Ref EQ and params				
Ref Package(s) Model and Params				
Test Methods				
Test TX Parameters				
Test RX Parameters				

Work Items for September

- Refine reference equalizer and parameter values
- Agree up and select reference package model and parameter values
- Classify contributed channels by “P/F”
- Investigate test method approaches
