

Brief on aspects of COM configuration for 200 Gb/s PAM 4

How to get what you want!

Richard Mellitz, Samtec

September 2023

Campinas, Brazil

Contents

- ❑ Intent, Thumbnail, and Caveats
- ❑ KR/CR and C2M splash shots
- ❑ Parameter organization
 - Operational Section: KR/CR & C2M
 - Rx FFE Section
 - Tx FFE, Fixed Tap DFE, and Rx Filter Section
 - Die Source Drive Section
 - Floating DFE Taps Section
 - Package Section
 - Continuous Time Filter (CTF) Section
 - Noise and Jitter Section
 - CR Added Host Interconnect Section
 - Frequency Domain Section
 - Control Section (in backup)

Intent, Thumbnail, and Caveats

- ❑ This presentation is relevant for IEEE802.3dj 200Gb/s per lane
- ❑ Values in the COM configuration spreadsheet are only starting points
 - In general, values may be considered conservative estimates
 - The idea is to start relative channel design evaluation
 - Understand this is unofficial and parameters will change
- ❑ COM spreadsheet is organized as adjacent cell pairs
 - The left cell is a keyword, and the right is its value
 - The pair is position independent
- ❑ The name of the COM configuration tab name must be “COM_Settings”
- ❑ What is included
 - How parameters interact
 - Which parameters need refinement and proposals for baseline
- ❑ What is not included
 - Individual syntax and detailed descriptions
- ❑ What is needed
 - baseline proposals or straw polls for sections as listed in the following slides

KR/CR tp0d to tp5d starting point

Previously COM for CM2 was not specified
Only used for standards development

Operational Section: KR/CR

Operational		
ERL Pass threshold	10	dB
COM Pass threshold	3	dB
DER_0	1.00E-04	
T_r	0.00400	ns
FORCE_TR	1	
PMD_type	C2C	
EW	1	
MLSE	0	
ts_anchor	1	
sample_adjustment	[-8 8]	samples
Local Search	2	

- Needs proposal for baseline
- Historical
- C2M will have different DER_0
- Needs proposal for baseline
- Needed for backward compatibility
- Default
- Plots eye diagram at DER_0
- Do not use yet
- Pulse peak anchor
- Data suggest +/- 8 samples is enough
- Speeds up execution

Operational Section: C2M

THIS FOR EVALUATION AT THE MODULE DIE

- Enables VEC and EH to be reported
- ran 3dj elec 02 230622

- Eventually this will be C2M

C2C will use COM as pass/fail but because VEC threshold is specified VEC and EH will be reported

- Pulse peak anchor
- Data suggest +/- 8 samples is enough
- Plots eye diagram at DER_0
- Do not use yet
- Speeds up execution

Rx FFE Section – do not use with DFE > 1

KR/CR AND C2M

Filter: Rx FFE

ffe_pre_tap_len	6	
ffe_post_tap_len	25	Up to 60 has been suggested
ffe_tap_step_size	0	
ffe_main_cursor_min	0.7	
ffe_pre_tap1_max	0.7	
ffe_post_tap1_max	0.7	
ffe_tapn_max	0.7	

• Number or pre cursor taps	Both 0 disables Rx FFE
• Number or post cursor taps	
• 0 is infinite resolution	
Starting point. Proposals needed.	

Tx FFE, Fixed Tap DFE, and Rx Filter Section

- f_r is the Butterworth filter cutoff
- Trend values are between 0.5 and 0.6
- This is used in combination with the CTF
- Need proposals for baseline
- When Rx FFE is used the Tx FFE has less effect on COM
- The compute time is direction proportional to the total number of FFE tap setting
- Need proposals for baseline
 - Number and range for Tx FFE
- Starting point is 1 DFE tap(N_b)
- b_max may be different when MLSE is used
- Need proposals for baseline
- Do not mix DFE with N_b >1 and Rx FFE

Floating DFE Taps Section

DISABLE IF RX FFE IS USED

Die load model
Values are trending and
from mli_3df_02_220316

Do not change R_0. COM now adjusts for s-parameter
reference

These are computed from
package, die load, and Vf
In general, if Vf is constant
lower R_d → lower A_v

Package Section: similar to benartsi_3df_01a_2211

- These setting are for a unity gain (at Fb/2) CTF
- The CTF range sweep may be reduced if Rx FFE is use
- Need to determine if this is OK for baselines
- Other pole zero options are scaling of Table 162-20

Port order and COM budget

Port order
[tx+ tx- rx+ rx-]

The most common COM problem is port order.

If the IL curves don't trend downward from about 0 dB, then the port order is most likely not as expected
