

EFM Copper

Work for the week

EFM May, 2002

**Hugh Barrass (Cisco Systems),
Chair. IEEE 802.3ah copper sub task force**

Quick summary

- **No change since Edinburgh...**
 - Baseline still not adopted by TF & WG**
- **New hope – “The Great Copper Compromise”**
 - Short + long reach objectives – aggregate support**
- **First draft (skeletal) for review**
 - Based on assumption of VDSL baseline adoption**
- **Goals for the week**
 - New objective – adopted by TF & WG**
 - Baseline (VDSL) – adopted by TF & WG**
 - Baseline for long reach – reviewed by STF (adopted?)**
 - Evaluation criteria (for short reach) – adopted by STF**
 - More detailed presentations, modifying objective**

The plan

- **First things first!**
 - Sunday in the main track – pass new objective + VDSL baseline**
- **New baseline for new objective**
 - Tuesday morning – two candidate PHYs**
- **Review draft 1.0**
 - Tuesday afternoon – adopt Behrooz’s first draft**
 - Maybe line-by-line**
- **Evaluation criteria**
 - Wednesday morning – short reach criteria, long reach TBD**
 - Adopt in STF – ready for approval by TF on Thursday**
- **More topics – remainder of Wednesday**
 - Modifications to adopted baselines, encapsulation, DMT topics**
 - AOB & motion madness**

The Copperheads march on...

- Questions?
