

Moving Forward

John D'Ambrosia

Chair, IEEE 802.3 Higher Speed Study Group

May 30, 2007

My Observations

- 100G > Aggregation Focus
 - PAR A
 - Networking Focus
 - Desires market distinction / avoid market confusion

- 40G > Server- Switch Interface Focus
 - Server Focus
 - Desires to get started at same time
 - Possible re-use of 10G / 100G technology
 - Agrees future spin-out may make sense

- LACK OF TRUST BETWEEN SIDES

Proposal

- Two PARs
 - PAR A – 100G Aggregation Ethernet (?)
 - PAR B – 40G Server Ethernet (?)
 - Take appropriate objectives from PAR A
 - Add requested objectives from frazier_02_0507
 - Create PAR / 5 Criteria
- May Interim - Motion to recommend passing both PARs with single vote at SG
- July Plenary - Motion to recommend passing both PARs with single vote at WG
- One Task Force
- Task Force addresses commonality of projects
- Task Force split into two task forces if / when appropriate
