Which registry are you requesting this assignment/registration be made in?

The assignment of the IANAifMauTypeListBits and IANAifMauAutoNegCapBits textual conventions as well as the dot3MauType object identities is contained in the IANA-MAU-MIB.

If possible, please give a brief description of why you need this assignment/registration:

The new MAU types and the associated AutoNeg capability bits listed above were specified in the IEEE 802.3 amendments IEEE Std 802.3bk-2013, IEEE Std 802.3bj-2014 and IEEE Std 802.3bm-2015, which are now published in IEEE Std 802.3-2015, as well as IEEE Std 802.3bw-2015, IEEE Std 802.3by-2016, IEEE Std 802.3bq-2016 and IEEE Std 802.3bp-2016.

The description of the IANAifMauTypeListBits textual convention states that "...changes in this textual convention SHALL be synchronized with relevant changes in the dot3MauType OBJECT-IDENTITIES.". The assignments are imported and referenced in the IEEE8023-MAU-MIB, which is defined in Clause 13 of IEEE Std 802.3.1-2013, "IEEE Standard for Management Information Base (MIB) Definitions for Ethernet."

Additional Information. Please include a reference to the specification or RFC (if available) that defines this number or name space:
