E-MAIL: David_Law@3Com.com

REQUESTED REVISION:
STANDARD: IEEE Std. 802.3-2000
CLAUSE NUMBER: Annex 30C.6
CLAUSE TITLE: Definitions for Link Aggregation MIB

PROPOSED REVISION TEXT:

Correct the following 3 errors related to the SNMP MIB published in 30C.6. In addition update the URL to use www.ieee802.org rather than grouper.ieee.org previously used.

[1] Restore the following notes -

NOTES

1 - As this text goes to publication it is believed that the identifier "802dot3" i.e., in the context 802dot3 (10006), violates ASN rules ref ASN 1 (X.208 Section 8.3) and will therefore produce a syntax error when compiled. IEEE is taking action to change this identifier to "ieee802dot3" as quickly as possible.

2 - The ASCII for 30C.6 is available from <http://www.ieee802.org/3/publication/index.html>

[2] Restore the following footnotes -

3 MIB definitions are available at <http://www.ietf.org/>.

4 Copyright release for SNMP MIB: Users of this standard may freely reproduce the SNMP MIB in this annex so it can be used for its intended purpose.

[3] The MIB should be published using a non-proportional font such as Courier.

RATIONALE FOR REVISION:

This text was approved as part of the IEEE P802.3ad project and published in IEEE Std. 802.3ad-2000 yet is missing from the consolidated edition IEEE Std. 802.3-2000. In addition the opportunity should be taken to update the URL to the latest version.

IMPACT ON EXISTING NETWORKS:

None.
