-----+

DATE: 19th Sep, 2006  
NAME: Brett McClellan  
COMPANY/AFFILIATION: Solarflare Communications  
E-MAIL: bmcclellan@solarflare.com

REQUESTED REVISION:  
STANDARD: IEEE Std 802.3an-2006  
CLAUSE NUMBER: 28.5.4.8  
CLAUSE TITLE: State diagrams

PROPOSED REVISION TEXT:

802.3an-2006 page 17  
28.5.4.8 should have an entry for item 13  
where "M" was changed to "!ENP:M"

RATIONALE FOR REVISION:

Item 13a was added in 802.3an-2006 to specify the nlp\_test\_min\_timer expiration period for the case that extended next pages are supported. The status of item 13a is "ENP:M".

Item 13 should have been modified to specify the timer expiration only for the cases where extended next pages are not supported.

Therefore the status of "M" should be changed to "!ENP:M"

IMPACT ON EXISTING NETWORKS:

None. This is a clarification that devices supporting extended next pages are not subject to the timer expiration specified by item 13.
