REQUESTED REVISION:  
STANDARD: 802.3-201x  
CLAUSE NUMBER: 33.4.9.1  
CLAUSE TITLE: Work area or equipment cable Midspan PSE

PROPOSED REVISION TEXT:

~~The Midspan PSE equipment to be inserted as "connector" or "telecom outlet" shall meet the following transmission parameters~~  
A connector Midspan PSE replaces one of the connectors in the link segment and shall meet the following transmission parameters. These parameters should be measured using the test procedures of ISO11801:2002 or ANSI/TIA-568-C.2 for connecting hardware.

RATIONALE FOR REVISION: An explanation of Connector Midspan PSE and how it is implemented within a link segment is needed. Align with the resolution to comment #116 against the draft 2.4 Working Group ballot recirculation of P802.3bt. I believe that this change can be implemented as part of the 802.3bt revision project.

IMPACT ON EXISTING NETWORKS: None
