3  |                                     |
4  | DATE: 5/10/2019                    |
5  | NAME: James A. McIntosh            |
6  | COMPANY/AFFILIATION: Microhip      |
7  | E-MAIL: james.mcintosh@microchip.com |
8  |                                     |
9  | REQUESTED REVISION:                |
10 |   STANDARD: 802.3-2018              |
11 |   CLAUSE NUMBER: 45.2.1.191.1      |
12 |   CLAUSE TITLE: Test mode control (1.2308.15:13) |
13 | PROPOSED REVISION TEXT:            |
14 |                                     |
15 | Change register number reference in text from "1.2307.15:13" to |
16 | "1.2308.15:13".                    |
17 |                                     |
18 | Also correct R/W type in Table 45-155 for bits 15:13. |
19 | Change from "RO" to "R/W".         |
20 |                                     |
21 |                                     |
22 | RATIONALE FOR REVISION:            |
23 |                                     |
24 | The register number is simply wrong. |
25 |                                     |
26 | The R/W type is also wrong for a control register and is assumed to be |
27 | an oversight.                      |
28 |                                     |
29 |                                     |
30 | IMPACT ON EXISTING NETWORKS:       |
31 |                                     |
32 | I assume no impact.  Anyone implementing the control register would have |
33 | had to implement it as R/W already. |
34 |                                     |
35 |                                     |
