Subject: Liaison reply to BBF on EPON YANG model development

Approval: Agreed to at IEEE 802.3 interim meeting, Geneva, Switzerland, 25th January 2018

Dear Mr. Fargano and members of the Broadband Forum Technical Committee,

Thank you for your communication of 7th December 2017 regarding the update on the current status of IEEE 802.3 EPON YANG model development.

The IEEE P802.3.2 (IEEE 802.3cf) YANG Data Model Definitions project is working on YANG model development for IEEE 802.3. The project is working on a YANG data model for EPON and the latest code for YANG models is available on github <https://github.com/YangModels/yang/tree/master/standard/ieee/802.3/draft>. We appreciate your review and your comments will be considered. The project is currently in the Working Group ballot.

¹ This document solely represents the views of the IEEE 802.3 Working Group, and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

We look forward to further communications on coordination on YANG modeling for EPON.

Sincerely,
David Law
Chair, IEEE 802.3 Ethernet Working Group
