Subject: Status of IEEE P802.3ck Task Force

Approval: Agreed to at IEEE 802.3 interim meeting, Geneva, Switzerland, 23<sup>rd</sup> January 2020

Dear Mr Palkert and members of INCITS T11.2,

IEEE P802.3ck (100 Gb/s, 200 Gb/s, and 400 Gb/s Electrical Interfaces Task Force) has adopted several baselines and created our initial draft (D1.0 attached). In our January meeting, members considered 240+ comments and approved the upcoming generation of draft D1.1. You can find the meeting materials at [http://www.ieee802.org/3/ck/public/20\\_01/index.html](http://www.ieee802.org/3/ck/public/20_01/index.html) and comment reports at <http://www.ieee802.org/3/ck/comments/index.html>.

We hope you find these helpful as you have a fruitful meeting in Fort Worth, TX, USA. We look forward to continued communications as both our projects/drafts progress.

Sincerely,

David Law  
Chair, IEEE 802.3 Ethernet Working Group
