Subject: Liaison to ITU-T SG15 on coordination between the IEEE P802.3cs Task Force and ITU-T Q2/SG15 project G.9807.3, Wavelength multiplexed point-to-multipoint 10Gb/s capable passive optical network

Approval: Agreed to at IEEE 802.3 interim meeting, Geneva, Switzerland, 23rd January 2020

Dear Mr Effenberger,

Given the similar objectives between the IEEE P802.3cs Increased-reach Ethernet optical subscriber access (Super-PON) Task Force and the ITU-T Q2/SG15 project G.9807.3, Wavelength multiplexed point-to-multipoint 10-Gigabit-capable passive optical network, we attach the current version of the P802.3cs draft, which is still very preliminary. It would be most appreciated if you could review the draft and have any interested party in Q2/SG15 submit comments toward it.

Our next face to face meeting will be in the week of 16th March 2020, in Atlanta, GA, USA. We also plan to have a conference call on 27th February 27 2020. The IEEE P802.3cs reflector subscription information can be found at <<http://www.ieee802.org/3/cs/reflector.html>>.

¹ This document solely represents the views of the IEEE 802.3 Working Group, and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

We appreciate your review and look forward to continued coordination on this development.

Sincerely,

David J. Law
Chair, IEEE 802.3 Ethernet Working Group
