Subject: Updated information on the progress of P1905.1a

Dear Paul Nikolich,

The 1905.1 WG would like to provide an update on the technical development progress of the IEEE 1905.1a working group. During the Paris face to face meeting, the work was advanced and new additions to the working document were approved.

At this point of time, the working document does not include material that will impact 802 related technologies. The WG does not anticipate modifying or adding material that will impact 802 related technologies. However, if in the course of development, we consider adding or modifying any material that may impact 802 related technologies, we will inform 802 accordingly.

Sincerely

Purva Rajkotia,
Chairman of IEEE Convergent Digital Home Network (CDHN) Working Group
