Subject: Power delivery over communications cabling

Approval: Agreed to at IEEE 802.3 Plenary meeting, San Diego, CA, USA, 28th July 2016

Dear Mr. Tison,

We congratulate you on the successful establishment of project IEC 60364-7-716 to develop DC power delivery over Information Technology Cable infrastructure. We are interested in this project and kindly request drafts of this document as they become available.

IEEE 802.3 would appreciate cooperating with IEC TC 64 to develop mutually acceptable specifications. We are attaching the current IEEE 802.3bt DTE Power via MDI over 4-Pair draft specification for your review. We request that this be shared only with your membership.

Sincerely,  
David Law  
Chair, IEEE 802.3 Ethernet Working Group

Enclosure: IEEE P802.3bt™/D2.0 Draft Standard for Ethernet Amendment: Physical Layer and Management Parameters for DTE Power via MDI over 4-Pair
