

Extended reach 40Gb Optical Ethernet

Call For Interest

Opening plenary report

Pete Anslow, Ciena

Hawaii, March 2012

# Motivation of this CFI

40Gb/s Ethernet is being applied to an increasing variety of applications, some of which require a longer reach than the 10km provided by 40GBASE-LR4. This Call for Interest will measure the interest in the formation of a study group (or expansion of an existing study group) to explore the market need and solutions for extended reach 40Gb/s Ethernet interfaces.

# Logistics

- There will be a consensus building presentation:
- Date – Monday 12 March
- Time – 8:30 pm
- Location – Queens 4/5/6 (this room)

- Presentation:
