IEEE 802.3 Maintenance Task Force
17th March 2016
Macao

Adam Healey
Chair, IEEE 802.3 Maintenance TF
Vice-Chair, IEEE 802.3 Working Group
Topics

- Project information
- Activities this week
- IEEE Std 802.3-2015 to ISO/IEC JTC/SC6 for approval
- IEEE Std 802.3-2015/Cor1 (IEEE 802.3ce) PAR
- Liaison response to ITU-T Study Group 15
- Future meetings
IEEE 802.3 Maintenance Task Force
Project information

• Task Force Organization
  – Adam Healey, Chair
  – Valerie Maguire, Recording Secretary

• Task Force web and reflector information
  – Reflector: http://www.ieee802.org/3/maint/reflecto...r.html
  – IEEE 802.3 Maintenance Request form:
    http://www.ieee802.org/3/private/maint/revision_request.html
    • Username: *****, Password: *****
Activities this week

• Discussed 4 maintenance requests

</tbody>
</table>

• Submit IEEE Std 802.3-2015 to ISO/IEC JTC1 SC6 for approval under PSDO
• Approved draft PAR for IEEE Std 802.3-2015/Cor1
• Approved draft liaison letter to ITU-T SG15 on multilane timestamping
Revision request status summary

- 21 open maintenance requests
  - Approved 21 * (21)**
  - Balloting 1 (1)
  - Ready for ballot 16 (18)
  - Awaiting clarification 0 (0)
  - Errata 0 (0)
  - To be categorised 4 (2)

* As shown on the maintenance web site
** Reflects pending updates
IEEE Std 802.3-2015 to ISO/IEC JTC/SC6 for approval
Task Force motion

• Motion #3: Submit IEEE Std 802.3-2015, as published, to ISO/IEC JTC 1/SC 6 for ratification under the PSDO agreement
  – M: G. Thompson    S: S. Carlson
  – Technical >= 75%
  – Passes by voice vote without opposition
Working Group motion

- Submit IEEE Std 802.3-2015, as published, to ISO/IEC JTC 1/SC 6 for ratification under the PSDO agreement
  - M: A. Healey on behalf of the Task Force
  - Technical >= 75%
  - Y: yy, N: nn, A: aa
  - MOTION PASSES/FAILS
IEEE Std 802.3-2015/Cor1
(IEEE 802.3ce) PAR
Task Force motion

• Motion #4: Approve the IEEE P802.3-2015/Cor 1 PAR in p802d3ce_cor1_par.pdf
  – M: V. Maguire    S: D. Law
  – Technical >= 75%
  – Passes by voice vote without opposition
Major PAR form questions

The PAR form is completed on-line in thought the myProject system. Many of the PAR question are proforma and are automatically complete by selecting a IEEE 802.3 amendment project. These items include sponsor and the Working Group officers.

This slideset therefore provides the nine major items from the PAR form to assist in consensus building leading up to approving a completed draft PAR form.
Help text: The title of the base standard is uneditable. Please enter the amendment title in the text box. The title should be sufficiently unambiguous, understandable by a NesCom member not from the society that submitted the PAR. All acronyms shall be spelled out in the title.
PAR item 4.2 and 4.3 Project dates

4.2 Expected Date of submission of draft to the IEEE-SA for Initial Sponsor Ballot:

09/2016

Help text: Additional communication and input from other organizations or other IEEE Standards Sponsors should be encouraged through participation in the working group or the invitation pool prior to Sponsor Ballot.

4.3 Projected Completion Date for Submittal to RevCom:

02/2017 05/2017

Help text: Enter the date the draft standard is planned to be submitted to RevCom for processing (not to exceed four years from the date of PAR submission). It is suggested to allow at least six months after Initial Sponsor Ballot for the ballot process. Cutoff dates for submitting draft standards to RevCom are generally in February, May, August, and October. Check the appropriate calendars for the specific dates as the draft matures. Use a best guess estimate for the PAR.
5.2.a Scope of the complete standard:

This standard defines Ethernet local area, access and metropolitan area networks. Ethernet is specified at selected speeds of operation; and uses a common media access control (MAC) specification and management information base (MIB). The Carrier Sense Multiple Access with Collision Detection (CSMA/CD) MAC protocol specifies shared medium (half duplex) operation, as well as full duplex operation. Speed specific Media Independent Interfaces (MIIs) provide an architectural and optional implementation interface to selected Physical Layer entities (PHY). The Physical Layer encodes frames for transmission and decodes received frames with the modulation specified for the speed of operation, transmission medium and supported link length. Other specified capabilities include: control and management protocols, and the provision of power over selected twisted pair PHY types.

Help text: If this Amendment will change the scope statement of the complete document (base + Amendment), it can be edited and should be explained in the Additional Explanatory Notes field at the end of the PAR form. If this Amendment will not change the scope statement of the complete document the pre-populated text should be left as is.
5.2.b Scope of the proposed changes:

Clarification of which lane of the media dependent interface (MDI) of a multilane Physical Layer entity (PHY) is used as the timestamping reference point.

Help text: State what the Amendment is changing or adding.
PAR item 5.3 – Project contingency

5.3 Is the completion of this standard contingent upon the completion of another standard (Yes or No)? If **yes**, please explain below:

**No.**

Help text: Your explanation should include how the standard is dependent upon the completion of another standard. Also, if applicable, why a PAR request is being submitted if the standard currently under development is not yet complete. The title and number of the standard which this project is contingent upon shall be included in the explanation.
PAR item 5.4 – Project purpose

5.4 Will the completed document (base + amendment) contain a purpose clause:

- [ ] Yes
- [x] No

Note: IEEE Std 802.3 does not contain a Purpose Clause.
5.5 Need for the Project:

The lane of the MDI of a multilane PHY that should be used as the timestamping reference point needs to be specified. Otherwise, the entire inter-lane skew may need to be accounted for in the receive minimum and receive maximum path data delay register values, impacting the timing accuracy that can be supported.

Help text: The need for the project details the specific problem that the standard will resolve and the benefit that users will gain by the publication of the standard. The need statement should be brief, no longer than a few sentences.
PAR item 5.6 – Stakeholders

5.6 Stakeholders for the Standard:

The stakeholders are users and producers of systems and components for time-sensitive networking applications. These applications include telecommunications, wireless backhaul, industrial control, and Smart Grid. 

Help text: The stakeholders (e.g., telecom, medical, environmental) for the standard consist of any parties that have an interest in or may be impacted by the development of the standard.
Working Group motion

• Approve the IEEE P802.3-2015/Cor 1 PAR in
  P802_3_2015_Cor_1_PAR_160316.pdf
  – M: A. Healey  S: S. Carlson
  – Technical >= 75%
  – Y: yy, N: nn, A: aa
  – MOTION PASSES/FAILS
Liaison response to ITU-T Study Group 15

[Draft liaison letter]
Task Force motion

• Motion #5: Approve
  IEEE_802d3_to_ITU_SG15_0316_draft.pdf with editorial license granted to the Chair (or his appointed agent) as liaison communication from the IEEE 802.3 Working Group to ITU-T Study Group 15.
  – M: D. Law   S: S. Carlson
  – Technical >= 75%
  – Passes by voice vote without opposition
Working Group motion

• Approve IEEE_802d3_to_ITU_SG15_0316_draft.pdf with editorial license granted to the Chair (or his appointed agent) as liaison communication from the IEEE 802.3 Working Group to ITU-T Study Group 15.
  – M: A. Healey    S: S. Carlson
  – Technical >= 75%
  – Y: yy, N: nn, A: aa
  – MOTION PASSES/FAILS
Future meetings

• Week of 23rd May 2016
  – Whistler, BC, Canada
Questions?

Thank you!
