Abstract: This LS invites the ITU-T and ITU-R Study Groups and other standards organizations engaged in developing standards related to HNT to review and provide their updates on the new version of the Home Network Transport (HNT) Standards Overview and Work Plan.

ITU-T Study Group 15 entrusted WP1/15, under Question 1/15, with the task to manage and carry out the Lead Study Group on Home Network Transport (HNT) Standards activities.

The existing HNT standards are listed in the web-based HNT Standards Overview.

A new web presentation of HNT Standards Overview hosted in the web-based ITU-T Standards Landscape – found on SG15 website on page “Documentation” and at URL https://www.itu.int/itu-t/landscape/?topic=tx153&group=g&search_text= has been implemented and replaces the lists of published Standards and Recommendations shown in tables of the previous versions of the HNT Standards Overview and Work Plan document. This HNT document has been restructured to describe the taxonomy of the new web presentation of the HNT Standards Overview and provides a guide on its use.

The web-based HNT Standards Overview as well as the document HNT Standards Overview and Work Plan were revised during the ITU-T SG15 meeting, 17-28 April 2023.

The new updated versions from this April 2023 meeting can be found at https://www.itu.int/en/ITU-T/studygroups/Pages/sg15-hnt.aspx.
Q1/15 would like to express thanks for your kind cooperation, especially to those organizations that have been previously contacted and made specific recommendations to update the HNT Standards Overview and Work Plan by LS.

As usual after each revision, Q1/15 would like to draw your attention to the HNT Standards Overview and Work Plan and would appreciate any suggestions and comments.

Home Network activities outside ITU-T SG15 WP1/15

The published HNT standards concerning your group are listed in the new web-based HNT Standards Overview hosted on the ITU-T SG15 website page “Documentation” and at https://www.itu.int/itu-t/landscape/?topic=tx153&group=g&search_text= and your revision will be welcomed.

Taxonomy of the new web presentation of HNT Standards Overview and guide on its use are provided in the document HNT Standards Overview and Work Plan hosted on the ITU-T SG15 website page “Documentation” and at https://www.itu.int/en/ITU-T/studygroups/Pages/sg15-hnt.aspx and your comments will be welcomed.

Section 3 “Home Network activities in other ITU Study Groups” and Section 4 “Home Network activities in other Standards Development Organizations” provide information on the Work Plans and ongoing HNT activities of various standardization groups outside ITU-T SG15 WP1/15. Q1/15 invite you to review the status of the standardization activities related to HNT within your group or organization and to point out identified issues, gaps and overlaps regarding HNT standardization.

Section 6 “List of Contacts” contains a contacts list of standards organizations engaged in developing standards related to HNT. Q1/15 will welcome your comments and suggestions on this list, including any candidate standards organizations to add or you believe could be removed as not pertinent to the HNT Standardization and Work Plan.

ITU-T SG15 looks forward to future liaisons with all pertinent ITU-T and ITU-R Study Groups, and other pertinent SDOs to keep the HNT Standards Overview and Work Plan current, relevant and effective.
