

IEEE-SA International Standards Program - MOU Program

Moira Patterson
November 2009

IEEE-SA Global Strategy

- Maintain a strong global standards perspective in IEEE
 - Leverage IEEE expertise, competence, track record, and processes to achieve global standards goals
 - Provide a forum to develop market-relevant standards
 - Promote global usage of IEEE standards
- MOU Program to foster relationships with organizations around the globe

Common MOU Elements

- Share information about standardization activities
- Establish staff liaison relations between organizations
- Allow adoption of IEEE standards as national standards
- Organize joint events
- Facilitate technical cooperation

Signed MOUs

- MOUs with organizations in:
 - Canada
 - China
 - Israel
 - Japan
 - Korea
 - South Africa
- Over half a dozen currently under development

Proposed MOU with TTA

- IEEE-SA and TTA are developing MOU to promote communication between organizations
- Expected completion by the end of the year
- Technical cooperation annex
 - Sharing documents
 - Observers
 - Finalize list of groups and contact persons
