Subject: Liaison to TIA TR-42 from IEEE 802.3

Approval: Agreed to at IEEE 802.3 Plenary meeting, Dallas, TX, 14th of November 2013

Dear Mr. Jensen,

Thank you for your liaison letter from October the 7th, 2013, outlining the scope of your work as well as your recent progress.

The IEEE P802.3bp project is currently developing performance specifications, working in co-operation with automotive OEMS, for the automotive link segment and has already adopted a number of baselines. In addition, the Task Force, working in co-operation with automotive OEMs, is developing performance specifications for EMC and noise. Our current work may be found at <http://ieee802.org/3/bp/>.

¹ This document solely represents the views of the IEEE 802.3 Working Group, and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

We wish to thank the leadership and members of the TIA TR-42 for continued close cooperation, and we look forward to the update on new and relevant developments as your work project progresses.

Sincerely,

David J. Law
Chair, IEEE 802.3 Ethernet Working Group
