Subject: Liaison reply to ITU-T Study Group 9 Liaison Statement on LS on AAP Consent of draft new Recommendations ITU-T J.195.2 and J.195.3.

Approval: Agreed to at IEEE 802.3 Plenary meeting, San Antonio, TX, USA, 6th November 2014

Dear Mr. Webster and members of ITU-T Study Group 9,

Thank you for your communication of 12 September 2014 regarding the status “AAP consent” for the new Recommendations ITU-T J.195.2 (ex. J.HiNoC-phy) “PHY layer specification of high performance network over coax” and J.195.3 (ex. J.HiNoC-mac) “MAC layer specification of high performance network over coax”. While it appears that this activity focuses on areas that are beyond the scope of IEEE 802.3, we want to make sure that you are aware that IEEE 802.3 has been working on project IEEE P802.3bn EPON Protocol Over Coax. This project is in progress and we anticipate being able to send a draft in the future.

We look forward to receiving updates as your work progresses.

Sincerely,
David Law
Chair, IEEE 802.3 Ethernet Working Group
