Thank you very much for the Liaison entitled “NetConf(NC)/YANG management for PON”. It was reviewed in the ITU-T Q2/15 meeting. We agree that it is definitely valuable and necessary to study a common PON management for various types of PON systems.

We received some contributions related to this topic in this meeting. Although we have not reached any agreements on how ITU-T works on this so far, we will continue to discuss this topic in our future meetings with the contribution-driven basis.

Q2/15 is interested to continue to cooperate with Broadband Forum to progress this study.
