Subject: Reply to liaison SC 25 N 2624

Approval: Agreed to at IEEE 802.3 Plenary meeting, San Antonio, TX, USA, 10<sup>th</sup> November 2016

Dear Dr Oehler,

Thank you for your detailed and thoughtful reply to the questions posed in our liaison communication approved 28th July 2016. We understand that operation of cabling above 60°C is a complex topic and would require considerable investment to undertake. We do not think it is appropriate to begin this research at this time. We will be in contact if we believe a research program becomes necessary and would appreciate notification if your group starts such a project.

Sincerely,  
David Law  
Chair, IEEE 802.3 Ethernet Working Group
