Subject: Liaison reply to ITU-T SG15 on coordination of Ethernet information and data modelling

Approval: Agreed to at IEEE 802.3 plenary meeting, Bangkok, Thailand, 15th November 2018

Dear Mr. Lam,

Thank you very much for your communication.

We appreciate the information and invitation to the monthly conference call. We want to inform you that the IEEE P802.3.2 (IEEE 802.3cf) Draft Standard for Ethernet YANG Data Model Definitions is currently in Sponsor ballot. We are expecting to finish the project in 2019 Q1. This draft includes a YANG module for Ethernet Link OAM which is defined in IEEE Std 802.3-2018 Clause 57. The latest code for YANG models and comment procedures are available on GitHub at the URL:

<https://github.com/YangModels/yang/tree/master/standard/ieee/802.3/draft>

¹ This document solely represents the views of the IEEE 802.3 Working Group, and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

We appreciate your review and your comments and look forward to continued coordination on the development of YANG models for Ethernet Link OAM.

Sincerely,
David Law
Chair, IEEE 802.3 Ethernet Working Group
