Subject: Reply to Incoming Liaison 3N1300, multidrop cabling

Approval: Agreed to at IEEE 802.3 plenary teleconference meeting, 11 November 2021

Dear Mr Oehler,

We would like to thank you for your communication 3N1300. The IEEE P802.3da 10 Mb/s Single Pair Multidrop Enhancements (SPMD) Task Force is in the process of creating a draft ready for Task Force review. As such, the draft has not yet achieved a state that warrants sharing outside the Task Force. The first version of a draft that can be shared will still be a Task Force review draft, so it will still be early in the IEEE 802.3 process. IEEE 802.3 will inform ISO/IEC JTC1/SC25 WG3 when the draft is stable enough to share.

¹ This document solely represents the views of the IEEE 802.3 Working Group and does not necessarily represent a position of the IEEE, the IEEE Standards Association, or IEEE 802.

In the meantime, if members of ISO/IEC JTC1/SC25 WG3 are interested in an early view, we note that IEEE 802.3 meetings are open to all, and IEEE 802.3 would welcome participation.

Thank you for your consideration.

Sincerely,
David Law
Chair, IEEE 802.3 Ethernet Working Group
