Abstract: This is a liaison statement to the ETSI ISG F5G, IEEE 802, Broadband Forum and is a reply to [SG15-TD173/GEN](#).

ITU-T SG15 would like to express appreciation to the ETSI ISG F5G for summary of recent activities in ETSI ISG F5G.

During the SG15 meeting held from 13 to 24 October 2025 in Geneva, Switzerland, we reviewed the liaison statement and related contribution. We would like to inform you the group agreed to start a technical report, GSTR.NCUS10G, to study network characteristics and use cases for the 10Gbps broadband era. This technical report is targeting for agreement in July 2026.

We would also like to inform the IEEE 802 and the Broadband Forum about this new technical report project, and kindly invite you to jointly contribute to this work.

SG15 looks forward to continued collaboration with the ETSI ISG F5G, IEEE 802 and Broadband Forum.
