

To
David Law
Chair, IEEE 802.3 Ethernet Working Group

Reutlingen, 8th of August 2018

Dear David,

At its last meeting working group ISO/IEC JTC 1/SC 25/WG 3 received your liaison letter "Update on IEEE P802.3cg 10Mbit/s over Single-pair Ethernet" (our document number ISO/IEC JTC 1/SC 25 N 2792). This letter contains a.o. the request for "guidance ... on connector standardisation". The working group agreed on a process for selection of "connecting hardware for single pair cabling" and instructed the convenor to communicate the result to you. The corresponding questionnaire was distributed as ISO/IEC JTC 1/SC 25 N 2807.

It is a pleasure for me to inform you, that more than 20 national bodies participated and that the result is unambiguous. The report of vote is in JTC 1/SC 25/2819/RQ and additional information is provided by JTC 1/SC 25/2820/INF.

To conclude, the decision is for the

- M₁I₁C₁E₁ variant: IEC 48B standardization project IEC 63171-1 (Variant 1 of ISO/IEC JTC 1/SC 25 N 2807) and for the
- M₂I₂C₂E₂/M₃I₃C₃E₃ variant: IEC 48B standardization project IEC 61076-3-125 (Variant 2 of ISO/IEC JTC 1/SC 25 N 2807)

Please do not hesitate to contact me, if you have further questions.

Best regards,

Convenor, ISO/IEC JTC 1/SC 25/WG 3
