

IEEE 802[®] Standards Consolidation and Editions

IEEE 802 Plenary

Opening EC

March 2012

Karen McCabe

Senior Director, Strategic Marketing & Product
Development

What are Consolidations and Editions?

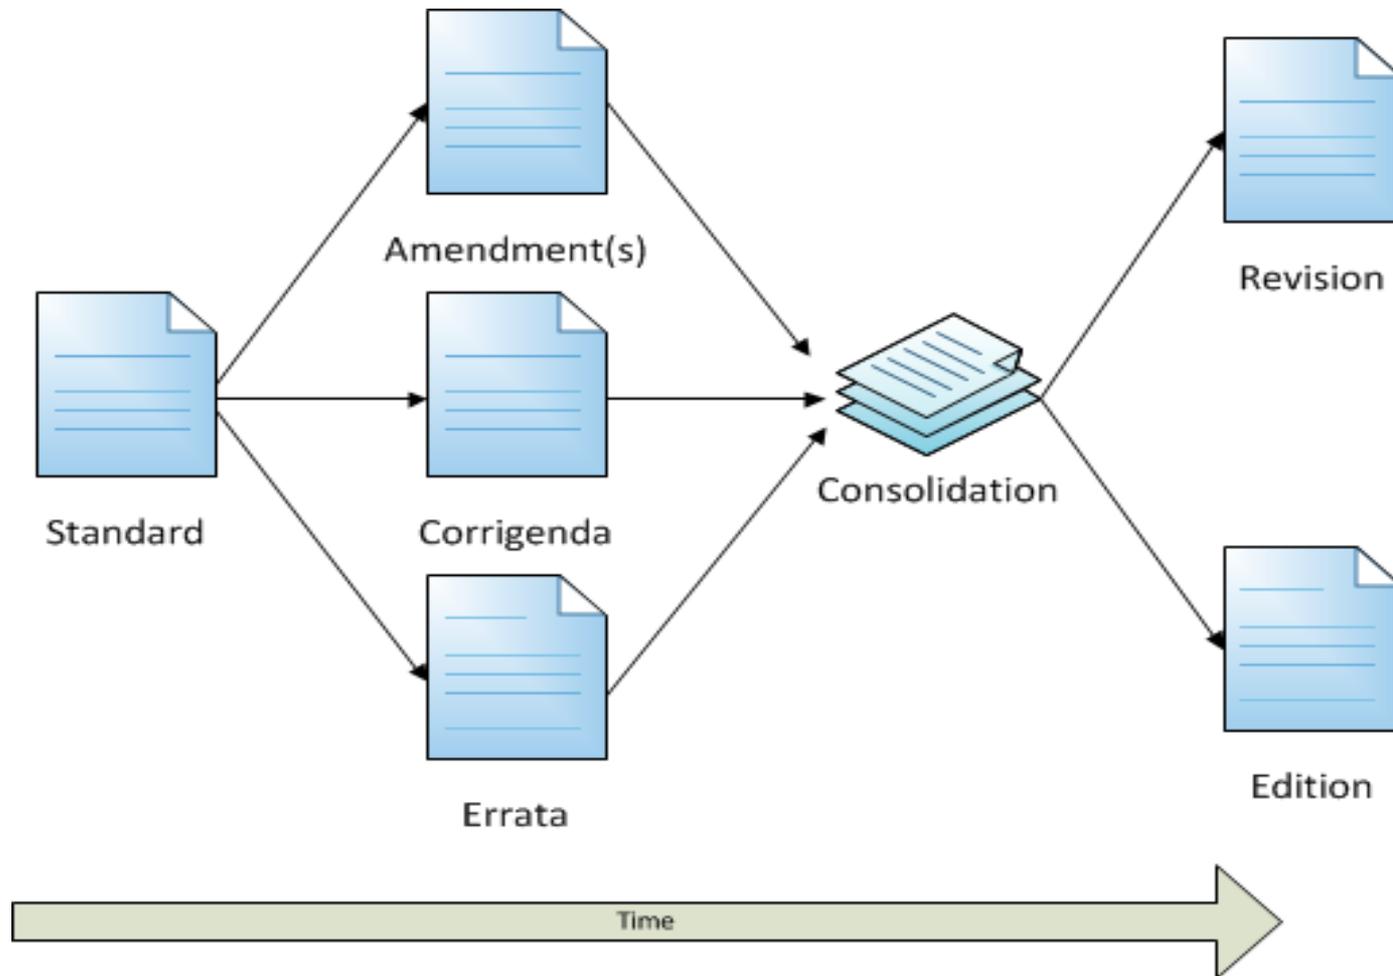

■ Consolidation:

- **A document** that consists of amendments, corrigenda & errata rolled into the root standard. The document contains **no new material** and **does not require a PAR.**
- Two types of consolidations:
 - **Revision Consolidation Draft:**
 - Created for the purpose of having a draft available for a Revision PAR
 - **Working Group Consolidation:**
 - Created for the convenience of the working group

■ Edition:

- A product that is made available for sale
- Once the Working Group Consolidation is made available for sale, it is referred to as an Edition.
- **The Edition does not supersede approved standards, amendments or corrigenda.**

Process Timeline

Requirements for Requesting a Consolidation

- **Working Group Consolidation:**

- Can be requested after a minimum of every 3rd amendment or corrigenda

- **Revision Consolidation Draft:**

- Requires no minimum number of amendments or corrigenda, but must be in support of a revision project.

- Requests for both types of consolidations must be made **at least four months** prior to the date they are needed.

How to Request Consolidations

- All requests shall be made by the Sponsor or Working Group Chair
- Email requests to:
 - Michelle Turner, Sr. Program Manager Document Development (m.d.turner@ieee.org)
- Summarize what will be included in the consolidated draft
 - i.e., approved amendments, corrigendum, errata, and drafts that may have been submitted to RevCom

THANK YOU!
