IEEE 802 has pushed ten standards completely through the PSDO ratification process

802.1AE	Passed (2013)	Passed (21 Oct 2013)	Liaised in Jan 2014
802.1AB	Passed (May 2013)	Passed (18 Dec 2013)	Liaised in May 2014
802.1AR	Passed (May 2013)	Passed (18 Dec 2013)	Liaised in May 2014
802.1AS	Passed (May 2013)	Passed (18 Dec 2013)	Liaised in May 2014
802.3	Passed (2013)	Passed (16 Feb 2014)	Not required

802.11ae	Passed (Feb 2013)	Passed (28 Jan 2014)	Liaised in July 2014

IEEE 802 has ten standards in the pipeline for ratification under the PSDO

IEEE 802 standard	60 day pre-ballot	5 month FDIS ballot	Comments resolved
802.11ac	Passed (Sep 2014)	Closes 11 July 2015	Sent in Nov 2014
802.11af	Passed (Sep 2014)	Closes 11 July 2015	Sent in Nov 2014
802.1AEbw	Passed (Jan 2014)	Passed 1 Feb 2015	Consider in Berlin
802.1AEbn	Passed (Jan 2014)	Passed 1 Feb 2015	Consider in Berlin
802.1Xbx	Closes 19 March 2015	-	-
802.1Q-Rev	Closes 13 March 2015	-	-
802	Passed (Oct 2014)	Waiting for start	Sent in Feb 2015
802.3.1	Passed (Oct 2014)	Closes 19 June 2015	Sent in Nov 2014
802.22	Passed (May 2014)	Passed (Feb 2015)	None required
802.22a	Waiting for 802.22	-	-

The SC agreed in Nov 2014 on a process for developing & approving PSDO comment resolutions

In the beginning ...

- All 60 ballot and FDIS ballot comment responses were developed and approved by the IEEE 802 JTC1 SC and then the IEEE 802 EC

Now that we have matured ...

- Most WGs are processing and approving comment resolutions, and then forwarding the resolutions to IEEE 802 EC directly without involving the IEEE 802 JTC1 SC
- The IEEE 802 JTC1 SC is continuing to provide advice on non-technical comments, to ensure consistency across WGs

Going forward ...

- It is planned that we institutionalise the practice above
- It is expected that the WG Chairs and the IEEE 802 JTC1 SC Chair will keep each other informed

Overview

- This meeting provides what will be a final opportunity by IEEE 802 to revise/enhance our previous response to ITU-R Question 236/1, dealing with technologies and spectrum used in the management of Smart Grids. It should be noted that while IEEE 802.20 has been submitted along with other IEEE 802 Standards there is an effort underway to add a separate section that seems to duplicate 802.20
- The attendance varies depending on the topics & documents being considered. While we plan for ~15 representing all 802 WGs the actual attendance can be considerably more (or less).
- Final approval of documents is intended to be done Thursdays during AM1 and AM2.

Some of the items to be considered at this meeting

- The RR-TAG will review the being done in ITU-R WP1A dealing with a response to ITU-R Question 236/1 titled "Working Document towards a Preliminary Draft Report ITU-R SM [Smart Grid].
 - WP1A would like to complete the document at their next meeting and send it for approval in mid-2015, so they have asked for any comments or edits to be provided by 31 December 2014.
 - It has been agreed that the resulting document (Report or Recommendation) should provide information vital to a WRC (maybe in 2015) on deciding the spectrum needs for Smart Grid.
 - It should be noted that while IEEE 802.20 has been submitted along with other IEEE 802 Standards there is an effort underway to add a separate section that seems to duplicate 802.20
- We will review the FAA's drone rules, the FCC update/simplification of their rules and PARs proposed for approval at this Plenary.
- We anticipate a contribution dealing DSRC could be sent for our review.

Additional RR-TAG Items for March:

- Further contributions to ITU-R, FCC, and to other regulatory bodies are added as needed. Many of these items appear with short notice to the TAG and with very short response times.
- The RR-TAG agenda can be found on the RR-TAG's Mentor web site; expect that as normal there will be many revisions prior to the start of the meeting. Please check it for items of interest that may not be listed in the Opening Report.
- Don't forget that for the most part you can maintain your voting rights in your home group when you participate in the RR-TAG (and, of course, log your attendance correctly!).

Shellhammer presented the following slides

December Coexistence Lessons Learned Liaison

- In November the IEEE 802 Executive Committee approved the Coexistence Lessons Learned Liaison presentation to 3GPP
 - Doc IEEE 802.19-14/80r2
- The liaison was presented at the 3GPP TSG RAN meeting December 9, 2014
 - The presentation was well received. Several people thanked the IEEE for a very good presentation.
 - There was interest in understanding how much one 802.11 network affects another 802.11. They wanted to know if such a “baseline” existed in the IEEE.
 - They asked if the IEEE planned to do its own coexistence studies. We told them at this point the plan is to review and comment on the 3GPP coexistence studies.
 - They asked if the IEEE had ever considered developing a management and control channel in licensed spectrum, like in LAA. We explained that IEEE typically standardizes operation in unlicensed spectrum, even for control and management channels
 - 3GPP TSG RAN Chair mentioned that he would be presenting at the January IEEE 802 session and also could return to the IEEE after the completion of the Study Item

January Liaison from 3GPP

- The 3GPP TSG RAN Chair (Dino Flore) gave a liaison presentation to IEEE 802 at the January IEEE 802.19 session, which was advertised to all attendees of the January all-802 Interim and well attended by members of many working groups
 - <https://mentor.ieee.org/802.19/dcn/15/19-15-0008-00-0000-3gpp-and-unlicensed-spectrum.pdf> (doc IEEE 802.19-15/8r0)
 - There was a questions and answer period providing good interaction between TSG RAN Chair and 802 members
 - TSG RAN Chair volunteered to attend a future IEEE 802 meeting after the completion of the Study Item in June (most likely at the July IEEE 802 Plenary)

Discussion regarding Co-existence studies by IEEE. There is no relationship between co-existence studies and the new 19 CUB Study Group. It has been discussed in 802.19 whether co-existence studies should be undertaken. Decision has been to review other on-going studies.

It was discussed about having Shellhammer doing a presentation on his activities to 802.11. There is a call for a liaison to 802.19 on this topic. Steve will co-ordinate with Adrian.
